SSL VPN Setup for Macintosh

SSL VPN allows you to connect from off campus to access campus resources such as Entourage email client and file sharing. These instructions will guide you through the following:

- Logging into the VPN Server through the web
- Accessing Outlook Web Access
- Accessing your campus hard drive
- Logging out of Network Connect and VPN

Logging into the VPN Server through the Web

1. Open your web browser (Safari only!)
2. Type https://csufvps.fullerton.edu in the address window and enter
3. Enter your University “username” and “password” and click on “sign in”
4. You may get a message asking if you trust the certificate. If so, click the “Trust” button.
Accessing Outlook Web Access
To access your email from the web, click on the “Outlook Web Access” link.

Accessing your campus hard drive
Get your desktop computer name (done on your campus workstation). If you already know your computer name, skip to step 4.

1. Under the Apple key, click “System Preferences”
2. Click on the “Sharing” icon.
3. Make note of the computer name. (ex: janedoe-intel)

(Perform these steps on the computer you are setting up SSL VPN)

4. Under Client Application Sessions, Click on the Start button next to “Network Connect” to start your hard drive access process.
5. With a successfully connection, you will see the below icon and also an “Assigned IP: 137.151….”

6. To access your hard drive, click on “Go” and select “Connect to Server”
7. Enter computer name “username-g5.ad.fullerton.edu” or “username-intel.ad.fullerton.edu” and click the “Connect” button

8. At this point, you will be prompted for your username and password. Enter your campus username and password
9. Click on your “network username” for your hard drive. And click OK

Logging out of Network Connect and VPN
1. To disconnect, click on “Network Connect” and select “Quit Network Connect”
2. To Sign out of SSL VPN Access from the website, click on the “Sign Out” link in the upper-right side.
