Welcome to the Virtual Computing Lab

Hello College College Support Services

You do not have any current reservations.
Please make a selection from the menu to continue.

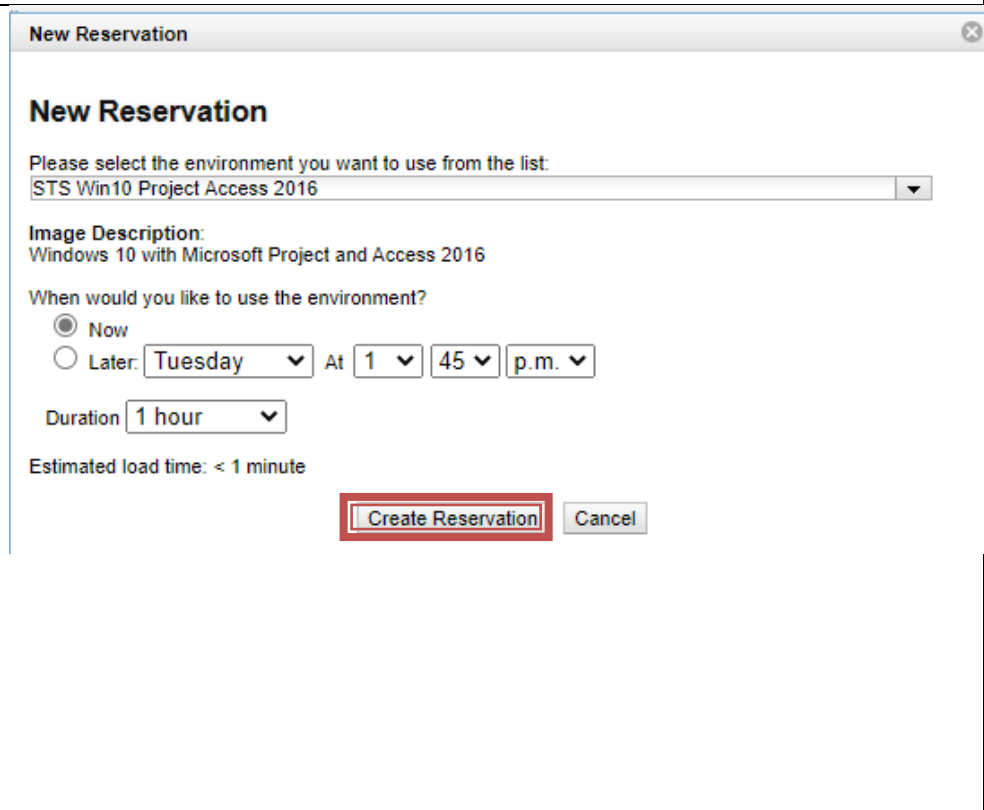

3. From the Drop-down menu, choose the software you would like to reserve.

For example, the user wishes to reserve a session with Windows 10, Microsoft Project, and Microsoft Access. User can choose the duration of the session (up to 4 hours) and make a reservation up to 4 days in advance.

The screenshot shows a 'New Reservation' dialog box. At the top, it says 'New Reservation' and 'Please select the environment you want to use from the list:'. A dropdown menu is open, showing 'STS Win10 Project Access 2016'. Below this, the 'Image Description' is 'Windows 10 with Microsoft Project and Access 2016'. The 'When would you like to use the environment?' section has 'Now' selected. The 'Duration' is set to '1 hour'. The 'Estimated load time' is '< 1 minute'. There are 'Create Reservation' and 'Cancel' buttons at the bottom.

4. Click the "Create Reservation" button to reserve your software.

The screenshot shows the same 'New Reservation' dialog box as above. The 'Create Reservation' button is now highlighted with a red box. All other elements, including the environment selection, image description, and scheduling options, remain the same.

5. Your reservation is now pending, and the wait time could last up to 10 minutes.

The screenshot shows a web interface with a left-hand navigation menu and a main content area. The navigation menu includes: HOME, Reservations (highlighted in blue), Block Allocations, User Preferences, Statistics, VCL gos, Documentation, and Logout. The main content area is titled 'Current Reservations' and contains a 'New Reservation' button. Below this, it states 'You currently have the following normal reservations:'. A reservation is listed as 'Pending...' with 'Est: 1 min remaining'. To the right of this reservation are buttons for 'Delete Reservation' and 'More Options...' (a dropdown menu). Further right, the text 'Environ' and 'STS Win' is visible. At the bottom of the main content area, a message reads: 'This page will automatically update every 20 seconds until the Pending... reserv'.

6. When your reservation is ready, click on the "Connect!" button to start your session.

If you don't connect within 15 minutes, your reservation will be timed out and you have to start the process again.

This screenshot is similar to the one above, showing the 'Current Reservations' page. The reservation is now ready, and the 'Connect!' button is highlighted with a red rectangular box. The rest of the interface, including the navigation menu and other reservation details, remains the same as in the previous screenshot.

Launching your VCL session:

7. Click on the “Get RDP File” button.

Please note the IP Address, User ID and Password. You will need this to log in when you launch your session.

Mac Users:

Please see step 11.

Ubuntu Users:

Please see step 12.

Connect to reservation using Remote Desktop

You will need to have an X server running on your local computer and a web browser running on the same computer from which you will be connecting.

Use the following information when you are ready to connect:

- Remote Computer: 137.151.224.231
- User ID: 899546725
- Password: T4TqHV

NOTE: The given password is for this reservation only. You will be given a new password for each reservation.

NOTE: You cannot use the Windows Remote Desktop Connect

Get RDP File

Copyright © 2004-2014 by Apact

8. Click the “OK” button to open up Remote Desktop Connection.

Opening ILC Win7 SPSS Amos 21 AcrobatXI.rdp

You have chosen to open:

ILC Win7 SPSS Amos 21 AcrobatXI.rdp

which is: Remote Desktop Connection (600 bytes)

from: https://vcl.fullerton.edu

What should Firefox do with this file?

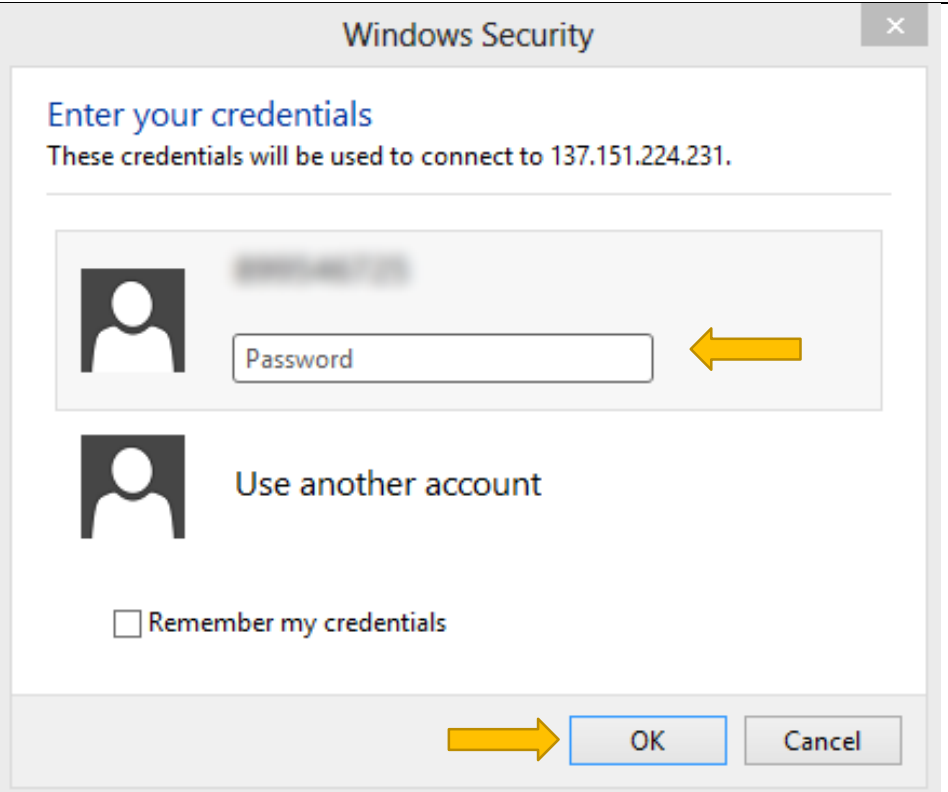

Open with Remote Desktop Connection (default)

Save File

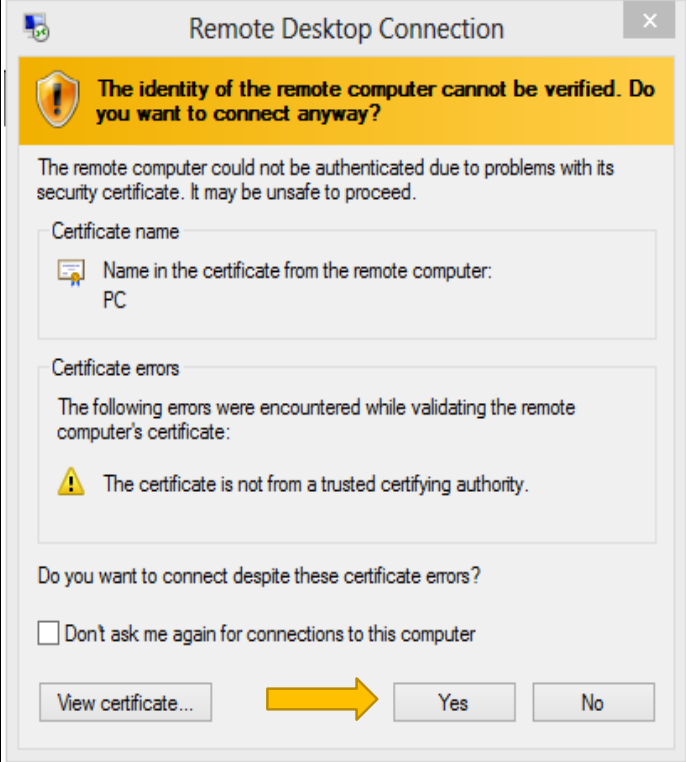

Do this automatically for files like this from now on.

OK Cancel

9. Enter your User ID and password from above and click the "OK" button.

10. Click the "YES" button to begin your session.

11. Mac users will need to install the Microsoft Remote Desktop app from the App Store. This free app allows a Mac computer to connect to a Windows-based computer.

Mac App Store Preview

Open the Mac App Store to buy and download apps

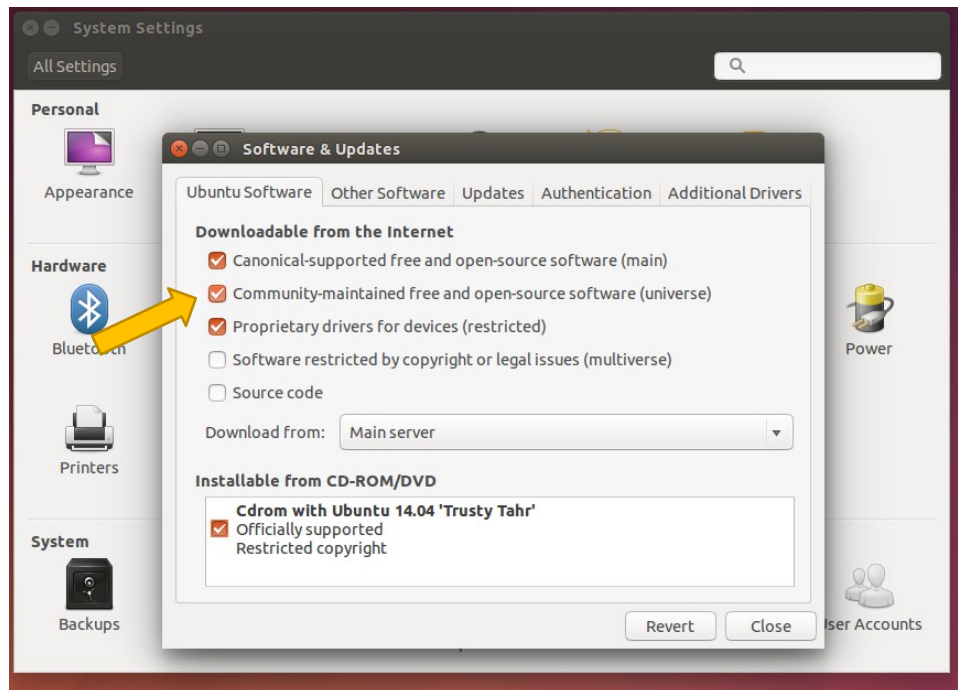

Microsoft Remote Desktop 10 4+

Work from anywhere
Microsoft Corporation

Free

12. Ubuntu users, please open up System Settings and click on Software & Updates. Under the Ubuntu Software tab, make sure the box for “Community-maintained free and open-source software (universe)” is checked. Close and reload.

13. Open a new Terminal window and type the following command: “sudo apt-get install rdesktop” and press ENTER.

This will install a software that will enable you to connect to Windows-based machines.

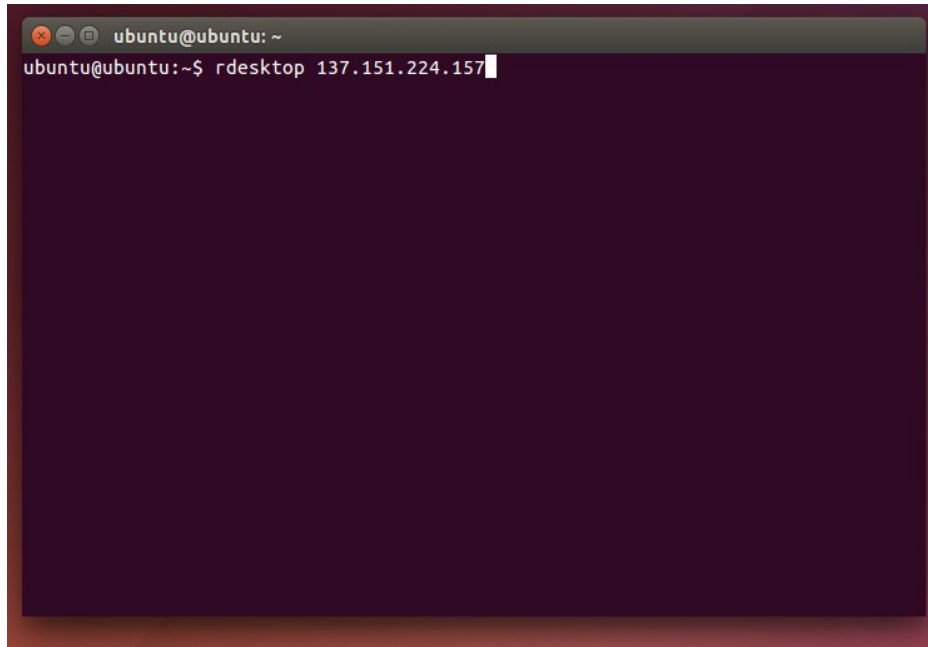

```
ubuntu@ubuntu: ~  
ubuntu@ubuntu:~$ sudo apt-get install rdesktop
```

14. With Terminal open, enter the command: “rdesktop 137.151.224.157” and press ENTER.

Your session will begin. Use your credentials above to log in.

Note: your IP address could be different from the one shown above.

```
ubuntu@ubuntu: ~  
ubuntu@ubuntu:~$ rdesktop 137.151.224.157
```

Saving and Accessing Drives

15. Work off of the VCL hard drive, and **REMEMBER** to move the files to your local hard drive or flash drive before your session ends! You will lose all your work if you don't.

Once the reservation time is up, you should get a popup warning, but in some cases you will not, so please **WATCH YOUR TIME!**
