* Software original cost no maintenance or ongoing licensing
    Software -- all software included
    Software -- all consulting for PeopleSoft implementation included in years 2005 through 2008
    Hardware -- all computers, printers, scanners, servers, networking equipment over $5,000 included
    Hardware -- all laptop and desktop computers reported on campus are figured at $250 per existing station. Actual cost would
        average $1,000 per station. Most computers are refreshed every 3 years so new purchases would average 1/3 the
        cost but some computers are never refreshed. So a cost of 25% of actual cost is used here for computers under $5,000
        each which until last year were not tracked in the asset system.
    Hardware – 2007/2008 includes all new computer equipment for new Steven J Mihaylo Hall building for
        College of Business
