**Fall 2005 was the last year that application statistics were compiled for lower division transfer students. The number of students with this entry status have dwindled down to a handful in recent years and those few students who do come in with this entry status are often admitted under exceptional circumstances.**

First-time Freshman: enrollment status = 5 (first-time) and level = 0 (first-time freshman)  
 Lower division transfer: enrollment status = 4 (transfer) and level = 1 or 2 (freshman or sophomore)  
 Upper division transfer: enrollment status = 4 (transfer) and level = 3 or 4 (junior or senior)  
 Graduate/Post Bac: enrollment status = 5 (first-time) and level 5 (grad/post bac)

\*All undergraduate exceptional ("special") admits (admissions basis = H, I, T, U) are EXCLUDED from the table because their patterns of app. to admit to enroll are so different from regularly admissible undergrads, and hence their changing numbers or differing proportion of undergraduate categories over time artificially change the admit and yield rates.

\*\*All other types of applications, such as a returning student, a returning transfer student, or a transitory student have likewise been EXCLUDED from the table for similar reasons.

**Fall 2005 was the last year that application statistics were compiled for lower division transfer students. The number of students with this entry status have dwindled down to a handful in recent years and those few students who do come in with this entry status are often admitted under exceptional circumstances.**

First-time Freshman: enrollment status = 5 (first-time) and level = 0 (first-time freshman)  
 Lower division transfer: enrollment status = 4 (transfer) and level = 1 or 2 (freshman or sophomore)  
 Upper division transfer: enrollment status = 4 (transfer) and level = 3 or 4 (junior or senior)  
 Graduate/Post Bac: enrollment status = 5 (first-time) and level 5 (grad/post bac)

\*All undergraduate exceptional ("special") admits (admissions basis = H, I, T, U) are EXCLUDED from the table because their patterns of app. to admit to enroll are so different from regularly admissible undergrads, and hence their changing numbers or differing proportion of undergraduate categories over time artificially change the admit and yield rates.

\*\*All other types of applications, such as a returning student, a returning transfer student, or a transitory student have likewise been EXCLUDED from the table for similar reasons.

**Fall 2005 was the last year that application statistics were compiled for lower division transfer students. The number of students with this entry status have dwindled down to a handful in recent years and those few students who do come in with this entry status are often admitted under exceptional circumstances.**

First-time Freshman: enrollment status = 5 (first-time) and level = 0 (first-time freshman)  
 Lower division transfer: enrollment status = 4 (transfer) and level = 1 or 2 (freshman or sophomore)  
 Upper division transfer: enrollment status = 4 (transfer) and level = 3 or 4 (junior or senior)  
 Graduate/Post Bac: enrollment status = 5 (first-time) and level 5 (grad/post bac)

\*All undergraduate exceptional ("special") admits (admissions basis = H, I, T, U) are EXCLUDED from the table because their patterns of app. to admit to enroll are so different from regularly admissible undergrads, and hence their changing numbers or differing proportion of undergraduate categories over time artificially change the admit and yield rates.

\*\*All other types of applications, such as a returning student, a returning transfer student, or a transitory student have likewise been EXCLUDED from the table for similar reasons.

**Fall 2005 was the last year that application statistics were compiled for lower division transfer students. The number of students with this entry status have dwindled down to a handful in recent years and those few students who do come in with this entry status are often admitted under exceptional circumstances.**

First-time Freshman: enrollment status = 5 (first-time) and level = 0 (first-time freshman)  
 Lower division transfer: enrollment status = 4 (transfer) and level = 1 or 2 (freshman or sophomore)  
 Upper division transfer: enrollment status = 4 (transfer) and level = 3 or 4 (junior or senior)  
 Graduate/Post Bac: enrollment status = 5 (first-time) and level 5 (grad/post bac)

\*All undergraduate exceptional ("special") admits (admissions basis = H, I, T, U) are EXCLUDED from the table because their patterns of app. to admit to enroll are so different from regularly admissible undergrads, and hence their changing numbers or differing proportion of undergraduate categories over time artificially change the admit and yield rates.

\*\*All other types of applications, such as a returning student, a returning transfer student, or a transitory student have likewise been EXCLUDED from the table for similar reasons.
