

Foundational Level Math

Cal State Fullerton offers a single subject credential program for a Foundational Level Mathematics (FLM) credential but does not offer a subject matter preparation program for this subject. Students planning to enter the credential program in FLM must pass the CSET Mathematics I & II subject matter exams. These exams cover advanced content knowledge in the areas of Algebra and Number Theory (Math I) as well as Geometry, Probability, and Statistics (Math II). More information on the CSET Math exams can be found at www.cset.nesinc.com.
