ENGINEERING
Academic Internships
(EGGN 495)

The Engineering academic internship (professional practice) provides students with professional work experience in the industry or government. The internship integrates and supplements the student's academic studies.

The course is worth 3 units but may be repeated. It is applicable towards bachelor’s degree programs, but is not for credit in the graduate program. A written report is required for successful completion.

Prerequisites
- Junior or Senior class standing in Engineering
- At least a 2.0 GPA for undergraduates. Graduate students must have a Study Plan GPA of at least 3.0
- Obtain verification and signature approval from the College Dean or Associate Dean to complete registration

What is an Academic Internship?
At Cal State Fullerton, academic internships are credit-bearing. Students enroll in an internship course and complete course requirements. The number of units you receive depends on the number of hours you complete at your internship site.

3 units = 120-150 hours

An academic internship is a work-learning partnership between a student, the university, and a host company or organization that bears a direct relationship to a student’s major and professional goals.
