● CMS is an Oracle/PeopleSoft software application, fully web-based, running on common hardware located in Salt Lake City for all 23 campuses
● The Chancellor’s Office (CMS Central) handles all common software changes for the CSU
● Campuses then “customize” the software to meet campus needs
● CMS Campus Solutions will replace SIS+ and TITAN Online by Fall 2008

  - including viewing/changing address data
Functionality / Benefits of CMS Campus Solutions (continued)

- Faculty self-service access to real-time class lists
  - with easy ability to email students in the class and post grades on the web
- Expanded Class Schedule search including searching by GE categories, listing pre-requisites and final exam schedules
- Articulated transfer coursework will be used in pre-requisite checking
- A more readable degree-progress report
- Registration wait listing functionality that we may choose to utilize
Functionality / Benefits of CMS Campus Solutions (continued)

- Will provide CSU Fullerton opportunities
  - To examine, revise and streamline current business processes
  - To improve documentation and training
- CMS Central will handle implementing all regulatory and CSU-mandated changes for all 23 campuses
  - eliminating the need for all 23 campuses to do this independently
- There is an opportunity to share best-practices, modifications and reports across all CSU campuses
Implementation Process:
What is an IDP?

- Interactive Design & Prototype (IDP) sessions
  - Examine current business processes and identify how those processes will change in PeopleSoft
  - Begin to identify any modifications we need in PeopleSoft
  - Setup of CMS tables (see examples below)
    - Careers, programs, plans, sub-plans (all our majors, minors, concentrations, etc.)
    - Colleges, departments, subject abbreviations
    - Degree audit rules
  - Begin data conversion from SIS+
  - Begin identifying critical reports and write them in the PeopleSoft environment
  - Will include end-users (academic department staff, faculty and students) for feedback later in the implementation
