

Six-Step Assessment Process: Student Learning Outcomes & Performance Outcomes

Assessment: Basics

09.20.18

Get ready for WSCUC

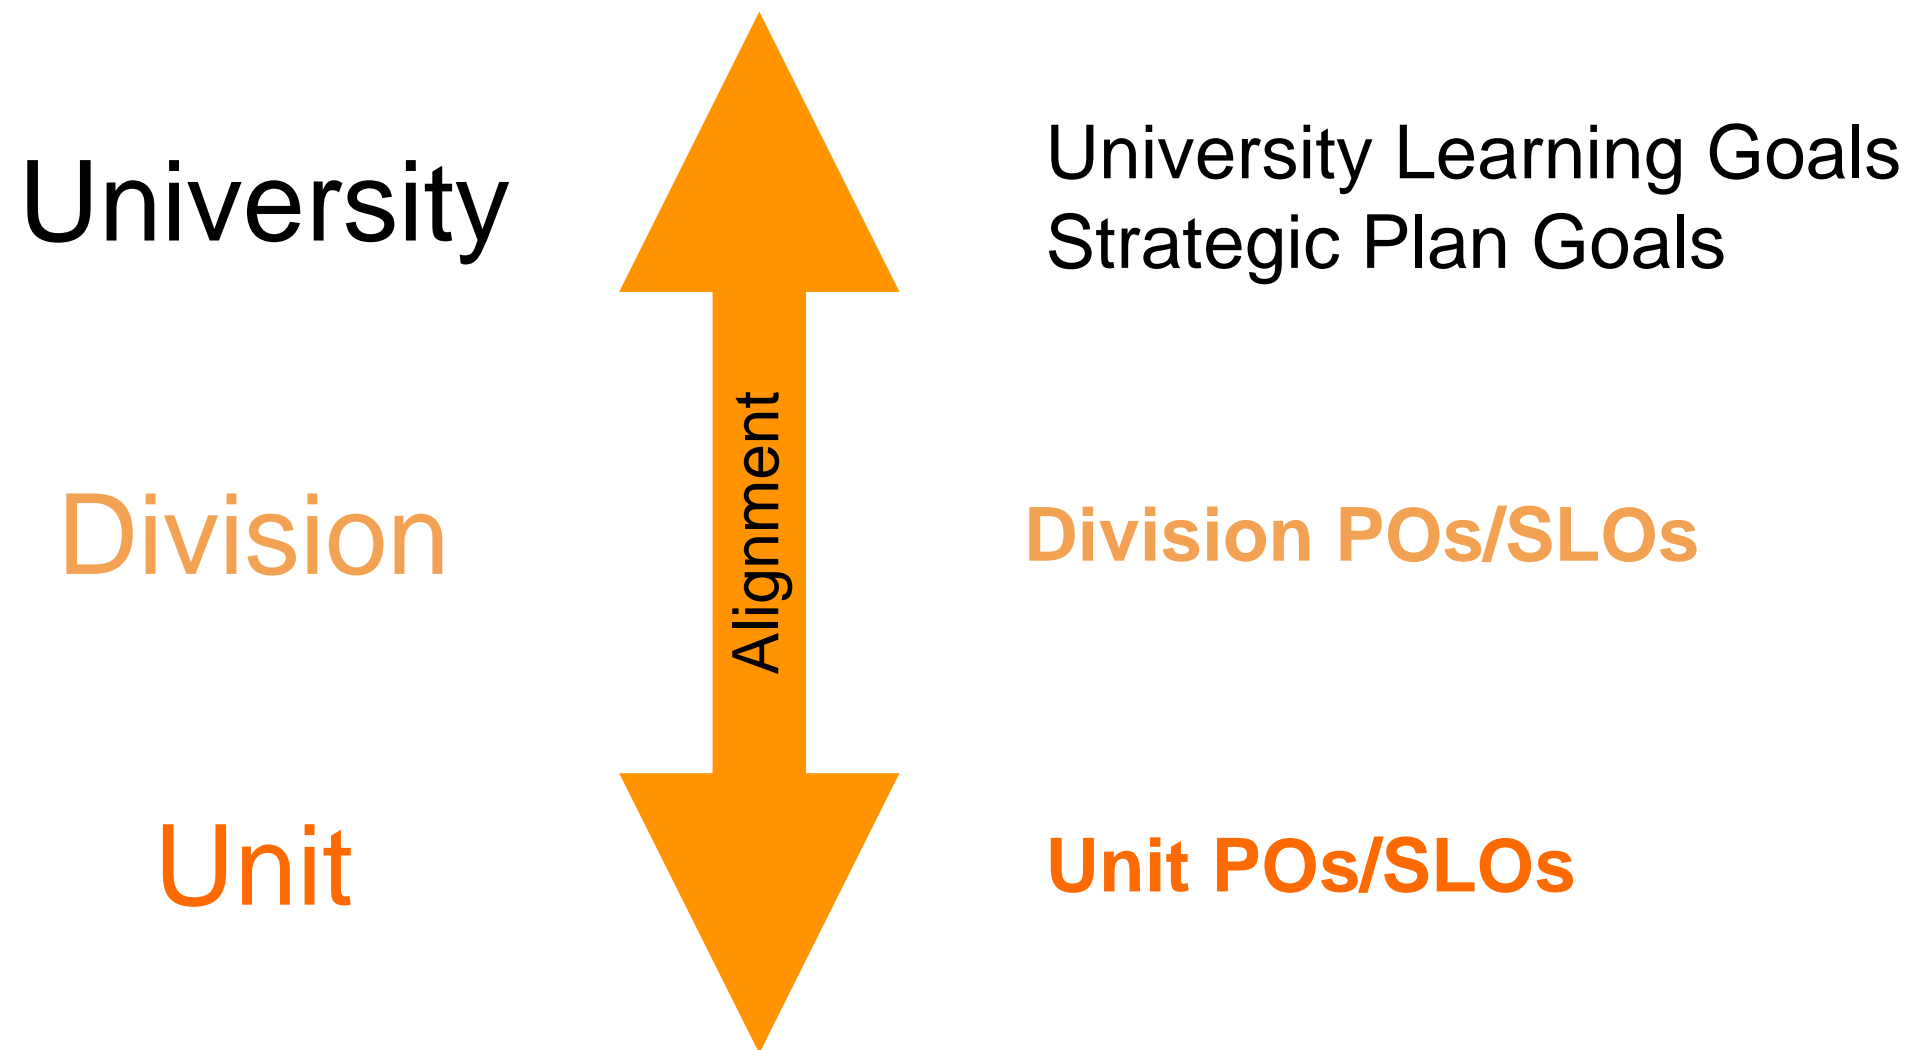

Areas of Concern:

- Integrated strategic plan
- Assessment
- Student success
- Funding

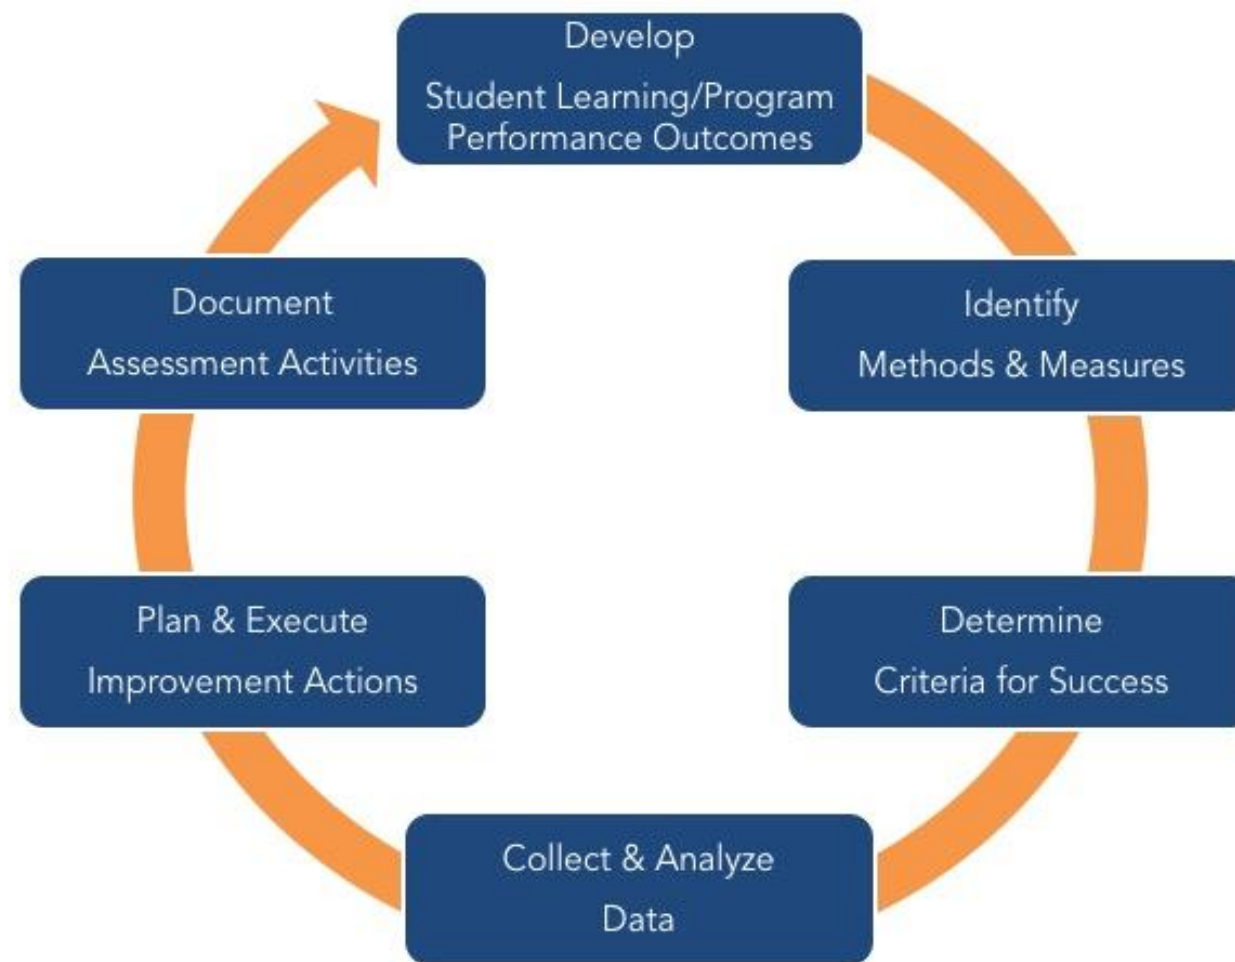

Where do we carry out assessment

Six-step assessment process*

What do we want our students to learn and/or our units to accomplish?

How are we documenting the assessment AND improvement activities/results?

*What changes are we making?
Are the changes working?*

*How are we doing?
How do we know?*

What evidence do we need to know to determine whether we are successful?

How do we use data to confirm/improve our practices?

Step 1: Develop SLOs/POs

- A statement

SLO

- Significant & essential learning that students achieve at the end of a program
- Knowledge; Skill; Attitude
- Focus on student learning

PO

- Measurable end results or consequences of activities, services, or program
- Variety of results
- Focus on operational effectiveness

SLO or PO?

Depends on the nature of the outcome, not the function of the unit

Where do outcomes come from

University

Division

Unit

Alignment

- “Top-down” vs. “Bottom-up”
- Adapt from existing “best practices”
- Engage faculty/staff
- Involve important but often forgotten stakeholders (students, alumni, employers, etc.)

Mission...Goals...Outcomes...Objectives...

Mission

Holistic vision of the values and philosophy of an institution/division/department/unit

Goals

Broad, general statements about general aims, purpose or expectations

Unit/Program-centered

Outcomes

Clear, specific “operational definitions” of goals

Customer/Learner-centered

What are good outcomes

- Customer/Learner-centered, not unit/program-centered
- Aligned with the mission and goals of university, division, college, etc.
- Focus on “high-priority learning”
- Real (not aspirational)
- Simple language
- Specific, clear and concise
- Demonstrable and measurable
- Discrete (no “double-barrel” statements)
- Manageable (more is not better)

**Adapted from Mary Allen workshop (2006) & ALA (2016)*

Sound SLOs are Active

| LEVELS of SLOs (Bloom et al., 1956) | BLOOM'S TAXONOMY EXAMPLE ACTION VERBS |
|---|--|
| Evaluation | Assess, Conclude, Criticize, Justify, Value |
| Synthesis | Assemble, Create, Design, Produce, Reconstruct |
| Analysis | Analyze, Compare, Differentiate, Experiment, Solve |
| Application | Apply, Demonstrate, Modify, Practice, Use |
| Comprehension | Convert, Explain, Interpret, Paraphrase, Report |
| Knowledge | Define, Describe, List, Name, Outline |

Outcome examples*

| Unit | PO | SLO |
|---------------------|---|--|
| Career Center | Students receive adequate support and feedback on their job seeking effort. | Students demonstrate professionalism in the job seeking process. |
| Center for Scholars | McNair Scholars are provided with step-by-step guidance to transition into graduate school. | McNair Scholars can identify necessary steps for a successful transition into graduate school. |
| OAIE | Student Assessment Scholars will receive high quality training to carry out learning assessment activities. | Student Assessment Scholars can apply basic research skills to carry out learning assessment activities. |

**Suggested, not actual, outcomes*

Case Study: Step 1

Step 2: Identify methods and measures learning

- We are *already* and *always* assessing how we are doing and/or how our students are learning
- The evidence/measures already in place are NOT always the best place to start
 - Do the measures address the outcomes?

A bit of vocabulary

Direct

vs.

Indirect

Value-added

vs.

Absolute

Embedded

vs.

“Add-on”/
External

Choosing the right measure

- **Valid:** Are you measuring the outcome?
- **Reliable:** Are the results consistent?
- **Actionable:** Do the results clearly tell you what students can or cannot do?
- **Triangulation:** Are there multiple lines of evidence for the same SLO?
- **Meaningful and engaging:** Are faculty engaged? Do students care?
- **Sustainable:** Can the process be managed effectively within the program context?

Direct measure examples

SLO

- Exam/Quiz
- Paper/Presentation
- Project/Portfolio
- Recital/Exhibition
- Peer evaluation

PO

- Quantity & quality of service
- Completion/Usage/Error rate
- Analysis of processing time
- Needs analysis/Gap analysis
- Customer/Supervisor evaluation

Indirect measure examples

SLO

- Self-reflection essay
- Self-report survey
- Interview
- Focus group
- Report by alumni, employer, etc.

PO

- Customer survey**
- Interview
- Focus group
- Comparison to best practices in the profession

Use as supplemental evidence

***Surveys are not always indirect assessment*

Direct evidence helps tell us “what”, and indirect evidence helps tell us “why”.

Triangulating direct and indirect measures

Career Center:

SLO: Students demonstrate professionalism in the job seeking process

DIRECT

- Scenario-based exam questions
- Rubric scoring of job seeking materials
- Interviewer/employer evaluation

INDIRECT

- Self-assessment survey
- Graduate survey
- Alumni interview

Triangulating direct and indirect measures

Center for Scholars:

PO: McNair Scholars are provided with step-by-step guidance to transition into graduate school.

DIRECT

- # of guidance or advising sessions provided per student
- % of students successfully transitioned into graduate school
- Student survey on quality of service provided

INDIRECT

- Survey of graduate school admission officers
- Comparison of successful transition rate with peer institutions

Triangulating direct and indirect measures

Office of Assessment:

SLO: Student Assessment Scholars can apply basic research skills to carry out learning assessment activities.

DIRECT

- Exam questions on relevant research skills
- Final project (paper/presentation)
- Department (i.e. client) evaluation
- Peer evaluation

INDIRECT

- End-of-program survey on self-perceived skills
- Self reflection essay
- Focus group

Case Study: Step 2

What are rubrics

- Scoring guides that explicitly classify learning products/behaviors into categories that vary along a continuum.
- No one format - Flexible!

Basic elements:

| Criteria | Performance Levels | | | |
|---|---|---|--|---|
| | Capstone 4 | Milestones 3 2 | | Benchmark 1 |
| Explanation of issues | Issue/problem to be considered critically is stated clearly and described comprehensively, delivering all relevant information necessary for full understanding. | Issue/problem to be considered critically is stated, described, and clarified so that understanding is not seriously impeded by omissions. | Issue/problem to be considered critically is stated but description leaves some terms undefined, ambiguities unexplored, boundaries undetermined, and/or backgrounds unknown. | Issue/problem to be considered critically is stated without clarification or description. |
| Evidence <i>Selecting and using information to investigate a point of view or conclusion</i> | Information is taken from source(s) with enough interpretation/evaluation to develop a comprehensive analysis or synthesis. Viewpoints of experts are questioned thoroughly. | Information is taken from source(s) with enough interpretation/evaluation to develop a coherent analysis or synthesis. | Information is taken from source(s) with some interpretation/evaluation, but not enough to develop a coherent analysis or synthesis. | Information is taken from source(s) without any interpretation/evaluation. Viewpoints of experts are taken as fact, without question. |
| Influence of context and assumptions | Thoroughly (systematically and methodically) analyzes own and others' assumptions and carefully evaluates the relevance of contexts when presenting a position. | Detailed performance description | | Shows an emerging awareness of present assumptions (sometimes labels assertions as assumptions). |
| Student's position (perspective, thesis/hypothesis) | Specific position (perspective, thesis/hypothesis) is imaginative, taking into account the complexities of an issue. Limits of position (perspective, thesis/hypothesis) are acknowledged. Others' points of view are synthesized within position (perspective, thesis/hypothesis). | | | Specific position (perspective, thesis/hypothesis) takes into account the complexities of an issue. Others' points of view are acknowledged within position (perspective, thesis/hypothesis). |
| Conclusions and related outcomes (implications and consequences) | Conclusions and related outcomes (consequences and implications) are logical and reflect student's informed evaluation and ability to place evidence and perspectives discussed in priority order. | Conclusion is logically tied to a range of information, including opposing viewpoints; related outcomes (consequences and implications) are identified clearly. | Conclusion is logically tied to information (because information is chosen to fit the desired conclusion); some related outcomes (consequences and implications) are identified clearly. | Conclusion is inconsistently tied to some of the information discussed; related outcomes (consequences and implications) are oversimplified. |

Step 3: Determine criteria for success

- **A performance standard:**
 - What level of performance is good enough?
 - Pre-determined!
 - Supported by historical data, reasonable expectations, theoretical frameworks...

Criteria for success examples*

| Program/ Unit | PO | Measures | Criteria of success |
|---------------------|--|---|--|
| Career Center | Students demonstrate professionalism in the job seeking process | <ul style="list-style-type: none"> - Rubric scoring of job seeking materials - Student self-assessment survey | <ul style="list-style-type: none"> - 75% of students received a score of “adequate” or higher - 90% of students self-report as “confident” in demonstrating professionalism |
| Center for Scholars | McNair Scholars are provided with step-by-step guidance to transition into graduate school. | <ul style="list-style-type: none"> - % of students successfully transition into graduate school - Comparison of successful transition rate with peer institutions | <ul style="list-style-type: none"> - 95% of students successfully transition to graduate school - Success rate higher than the average of fellow CSUs |
| OAIE | Student Assessment Scholars can apply basic research skills to carry out learning assessment activities. | <ul style="list-style-type: none"> - Department (i.e client) evaluation - Focus group | <ul style="list-style-type: none"> - Student scholars on average receive 3.5 or higher (out of 5) evaluation score from the departments - Focus group participants express consensus that the Student Assessment Scholars have the necessary research skills |

*Suggested, not actual, outcomes

Case Study: Step 3

Step 4: Collect and analyze data

- **Sampling!**

- Relevant, Representative, and Reasonably sized
- **Determined by the outcome and unit context**
- Moderate sample size is sufficient (e.g. “50-80” rule; 20-30%).
 - Very large sample size is rarely needed.
 - If homogenous population, small samples are sufficient.

Case Study: Step 4

Step 5: Plan and execute improvement actions

- Review the assessment findings
- Determine plan for change (if needed)

Small changes matter

| Possible Changes for SLO | Possible Changes for PO |
|--|--|
| <ul style="list-style-type: none"> • Curriculum • Pedagogy • Faculty support • Student support | <ul style="list-style-type: none"> • Infrastructure • Program design • Service delivery • Tools used |
| <ul style="list-style-type: none"> • Resources • Assessment plan • More data collection? | |

NILOA (2014)

- Don't forget to re-assess the improvement actions!

Improvement actions example 1

- Associated Students, Inc.:
 - Student employees reported significant growth in oral communication skills, but not in written communication. Supervisor evaluation of student skills do not support students' positive self-report.
 - *Unit will 1) develop plans to investigate possible areas of improvement for student oral communication development; 2) review the nature of student employee positions; 3) adjust the outcome to truly reflect the skills applicable to student employee positions.*

Improvement actions example 2

- Disability Support Services:
 - In the new student orientation survey, over 80% of students expressed satisfaction of the overall quality of the orientation; over 80% of students indicated that they knew how to access DSS services.
 - Data exceeded the criteria of success - outcome met
 - *Unit will 1) review open-ended questions on the survey to identify specific ways to further improve the orientation program; 2) develop a direct assessment measure; 3) attend a disability related assessment conference to improve assessment plan.*

Improvement actions example 3

- Business Communication
 - Student writings of a case analysis were graded using the CLASS rubric, and found that students had the greatest deficiencies in “Strategy”.
 - *Program 1) collected additional demographic data to narrow down weakness population; 2) offered faculty development workshop on case analysis; 3) emphasized use of topic sentences and supporting evidence; 4) provided sample professional documents for use in classroom and homework exercises.*
 - *Writing communication scores improved 17% between 2009 and 2012*

Step 6: Document assessment activities

Organize planning and accreditation

Tell a coherent story

Weigh the pig AGAIN

Case Study: Step 5 & 6

A multi-year assessment plan

- **What to plan for:**
 - Timeline
 - Process
 - Participants
 - Steps to turn assessment results into improvement actions
 - Self-evaluation/Reflection of the assessment process

A multi-year assessment plan (cont.)

- **Guidelines:**

Outcome is not
for only 1 year

- Start with a small number of outcomes
- Determine a realistic assessment plan cycle, i.e. how long (e.g. 7 years) to complete meaningful assessment of all outcomes
- Create a multi-year assessment plan that assesses 1-2 outcomes a year
- Consider overlapping assessment (of new outcomes) and improvement (of assessed outcomes) activities
- Make sure assessment involves the entire unit
