

Be honest!

Don't cut & paste. Use the internet responsibly.

The Internet is a valuable resource, but it's all too easy to misuse it when doing research. When using information from the Internet, **don't cut and paste material without acknowledging where it came from**. Always give credit to any material you find on the Internet by citing sources properly.

Find out what every student needs to know about our university policies, strategies for maintaining integrity in and out of the classroom and much, much more by visiting our website:
