www.scsengineers.com**SCS ENGINEERS****Paid Intern****15-20 Hrs Week Part-time****Summary:**

SCS Engineers is seeking a part-time recycling and waste management professional to enhance our practice in our Southern California office.

Firm Description:

SCS is an award-winning, employee-owned environmental consulting firm. Since 1970, we've developed engineering and scientific solutions to problems involving protection of the environment and resource conservation. Our solid waste planning division offers high-quality recycling and waste management consulting services, including development of recycling programs for public and private sectors, performance of waste and recycling audits, contracting assistance, planning of recycling programs, and ensuring regulatory compliance.

Position Summary:

Candidates should be comfortable working in groups, and know how to initiate and follow projects through to completion. They should understand how to interpret data and develop creative and perceptive analysis. Strong verbal skills and proficiency at writing are imperative. The position requires work in the field and at the office, as well as ability to communicate with clients and government agency personnel. Duties may include auditing and data management. Work will be directed by a Senior Project Manager. Occasional overnight travel (usually in California) may be required.

Position Requirements:

1. An undergraduate degree in process.
2. Excellent skills in English, written and oral, with an ability to present reports.
3. Working competency in Microsoft Excel and Word.
4. Interpersonal skills involving work as part of a team.
5. Ability to plan, organize, monitor, and complete tasks according to established prerequisites.

Salary & Benefits:

For further information about the firm, see <http://www.scsengineers.com/plan.html>. Interested candidates should email or fax letter of interest, resume, and salary history to Lynn Cicchetti at lcicchetti@scsengineers.com.
