Reallocation Request

This form is to request the Department to reallocate a course that appears on your TDA which does not appear in the correct category. This may happen if you have taken an advisor-approved elective which was not automatically recognized by the TDA software, you have changed catalog years, courses transferred from another institution appear uncatagorized or the inccorect category.

This form may not be used by graduate students.

The request will typically be processed within ten business days. The outcome of the request will be communicated to the applicant through a Advising Note in the applicant's TDA. The Department Chair or designee has sole discretion to approve or deny these requests and those decisions are final and non-negotiable.
