

CALIFORNIA STATE UNIVERSITY
FULLERTON

**Annual Research, Scholarly and Creative Activities
Compendium
2008-2009**

Cal State Fullerton's commitment to academic excellence is reflected in the scholarly expertise of its faculty.

This compendium comprises the scholarly and creative contributions of the university's faculty during 2008-2009, particularly as it pertains to research: published books, manuals, monographs, refereed journal articles, juried/refereed art exhibits and performances.

Also highlighted in this collection, and continues to be one of Cal State Fullerton's strengths, are research projects involving student/faculty collaboration.

COLLEGE OF THE ARTS
Art

Houtman, A., Biological Science. Song of Anna's Hummingbird. One graduate student

Jones, C.E., Sandquist, D., Cohen, A., Biological Science. Woolly Star Project. Funded by Psmas. Seven undergraduate students, four graduate students

Koch, R., Biological Science. Completing Analysis of the Role of Protein Kinase C (PKC) in Ascidian Sperm Activation. Funded by CSUF Intramural, FDC, NIH-MARC. Two undergraduate students

Koch, R., Biological Science. Microtubular based-motors, cytoplasmic dynein and kinesin, are essential in mitochondrial translocation during sperm activation. Funded by CSUF Biology. One graduate student

Koch, R., Biological Science. Role of Phosphoinositide 3-Kinase (PI3K) in Ascidian Sperm Activation. Funded by CSUF Biology, ASI. One undergraduate student, one graduate student

Koch, R., Biological Science. Analysis of Crosstalk between G protein-coupled receptor- and Integrin-initiated Pathways during Ascidian Sperm Activation. Funded by ASI. One undergraduate student

Patel, N., David Drath, D., Joyce Ono, J., Biological Science. Development of protocols for directed differentiation of mouse stem cells into neurons that are suitable for undergraduates. Two undergraduate students, two graduate students

Patel, N. Biological Science, Regulation of apolipoprotein-E gene expression. Four undergraduate students, two graduate students

Patel, N. and **Stoddard, J.**, Biological Science. Drug discovery and training students for biotech/pharmaceutical industry. Funded by CSU-Fullerton MGI. Eight undergraduate students

Trevitt, J. and **Patel, N.**, Biological Science. Use of c-Fos expression in the basal ganglia to discover the mode of action for caffeine's anti-parkinsonian actions. Two undergraduate students

Sandquist, D., Biological Science. Mojave Plant Health. Funded by USGS. Four undergraduate students, one graduate student

Sandquist, D., Biological Science. Laguna Oak. Funded by CSUF. Two undergraduate students

Sandquist, D., Biological Science. Santa Ana River Woolly Star Conservation. Funded by PSOMAS. Four undergraduate students, four graduate students

Schenk, J., Biological Science. Resistance, Repair & Redundancy: Traits that Protect Shrubs against Drought-Induced Hydraulic Failure. Funded by NSF. Six undergraduate students

Schenk, J., Biological Science. Hydraulic characteristics and seedling growth traits of three leguminous desert phreatophytes differing in wood density. One graduate student

Murray, S. and **Smith, J.**, Biological Science. Experimental Restoration of the rockweed *Silvetia compressa* at Little Corona del Mar. Funded by City of Newport Beach. One graduate student

Murray, S. and **Smith, J.**, Biological Science. MARINe Monitoring Network: Rocky Shore Populations in Urban Southern California. Funded by Minerals Management Services, US Department of Interior. One undergraduate student, three graduate students

Murray, S. and **Smith, J.**, Biological Science. Distributions, abundances and feeding interactions with native consumers of non-indigenous seaweeds on urban southern California shores. Funded by USC Sea Grant. One undergraduate student, two graduate students

Stapp, P., Hoese, W., Sanquist, D., Biological Science. Effects of anthropogenic water inputs on Argentine ant invasion in riparian areas of southern Orange County. Funded by NSF-UMEB (SCERP). One undergraduate student

- Stapp, P.**, Biological Science. Effects of anthropogenic water inputs on Argentine ant invasion in riparian areas of southern Orange County. Funded by CSUF Undergraduate Support Initiative, Faculty-Student Research and Creative Activities. One undergraduate student
- Stapp, P.**, Biological Science. Plague as a model for low prevalence/epizootic disease dynamics. Funded by NSF-EID. Two undergraduate students, three graduate students
- Stapp, P.**, Biological Science. Shortgrass Steppe Long-Term Ecological Research. Funded by NSF-LTER. One undergraduate student, three graduate students
- Stapp, P.**, Biological Science. Monitoring of Harbor Boulevard Wildlife Underpass. Funded by Puente Hills Landfill Native Habitat Preservation Authority. One graduate student
- Stapp, P.**, Biological Science. Continued Monitoring of Harbor Boulevard Wildlife Underpass. Funded by Puente Hills Landfill Native Habitat Preservation Authority. Two graduate students
- Stapp, P.**, Biological Science. Effects of small mammals on post-fire vegetation recovery in the Mojave Desert. Funded by Western National Parks Association. One undergraduate student, one graduate student
- Tolmasky, M.**, Biological Science. Dealing with antibiotic resistance: antisense technology. Funded by NIH. Five undergraduate students
- Tolmasky, M.**, Biological Science. Stability of multiresistance plasmid pJHCMW1. Funded by NIH. Two undergraduate students
- Tolmasky, M.**, Biological Science. Functional characterization of gene cassettes in Tn1331. Funded by CSUF. One undergraduate student
- Tolmasky, M.**, Biological Science. Function of attC loci. Funded by CSU. One undergraduate student
- Walker, S.**, Biological Science. Moth Diversity along an elevational gradient. One graduate student
- Walker, S.**, Biological Science. Predation Risk and Aggression in Crickets. One graduate student
- Walker, S.**, Biological Science. Harassment and Toxic Sperm. One graduate student
- Walker, S.**, Biological Science. Behavioral Syndromes and Aggression: Developing a New Model System. Funded by CSU Special Fund for Research. Two undergraduate students, two graduate students
- Walker, S.**, Biological Science. Heads up: Sexual dimorphism in house crickets. Two undergraduate students, one graduate student
- Walker, S.**, Biological Science. Sex differences in immune response in house crickets. Two undergraduate students
- Walker, S.**, Biological Science. The influence of age and experience on courtship behavior in house crickets. One undergraduate student

- Walker, S.**, Biological Science. How does stress and sex influence senescence in house crickets. Two undergraduate students
- Zacherl, D.**, Biological Science. Can California Grunion Otoliths Act as Natal Tags to Determine Population Connectivity. Funded by Sea Grant. One graduate student
- Zacherl, D.**, Biological Science. Population Connectivity of Kellet's whelk. Funded by NSF. One undergraduate student, one graduate student
- Zacherl, D.**, Biological Science. Factors influencing population persistence of the Olympia oyster, *Ostrea conchaphila*. Funded by CSU. Two undergraduate students, two graduate students
- Zacherl, D.**, Biological Science. Larval vertical migration behavior in the marine snail *Kelletia kelletii* in the laboratory and field. Funded by CSU. One undergraduate student
- Zacherl, D.**, Biological Science. Linking statolith chemistry of *Aplysia californica* to watershed discharge plumes in the Southern California Bight. One graduate student
- Zacherl, D.** and **Eernisse, D.J.**, Biological Science. Native oyster systematics and historical ecology. Funded by NSF. Two graduate students
- Bonsangue, M.**, Mathematics. The Days of Pythagorus: An Historical Retrospective. Two undergraduate students
- Jamshidian, M.**, Mathematics. Tests of homogeneity of covariances with application to detecting missing data mechanism. One graduate student
- Lee, C.H.**, Mathematics. Numerical Schemes in Maximizing Stock Return. One undergraduate student
- McMillen, T.** and **Bourget, A.**, Mathematics. Interlacing and non-orthogonality of spectral polynomials of the Lamé operator. One undergraduate student
- Pagni, D.**, Mathematics. MISDD. Funded by local business. Four undergraduate students, four graduate students
- Pineda, A.**, Mathematics. Mathematics of Medical Imaging (MoMI). Funded by NIH, CSU Start-up Funds. Three undergraduate students, one graduate student
- Cheng, K-P**, Physics. Detecting Planets by Comparing a Star's Model Spectrum with its Observed Spectrum. Funded by CSUF. One undergraduate student
- Feagin, J.**, Physics. Few Body Fragmentation Interferometry (Theory). Funded by DOE. Four undergraduate students
- Khakoo, M.**, Physics. Electron Scattering from Atomic Species. Funded by NSF. Four undergraduate students
- Khakoo, M.**, Physics. Electron Scattering from Bio-molecules, Collaboration with Caltech-Noyes Lab and three Universities in Brazil. Funded by NSF-CNPq-FAPES. Three undergraduates, one graduate

Khakoo, M., Physics, Electron Spectroscopy of N₂, Collaboration with JPL and Caltech-Spitzer. Funded by NSF-NASA. Three undergraduate students, one Ph.D., two high school students

Loverude, M., Physics. Research-based labs in introductory mechanics. Funded by NSF. Seven undergraduate students

Loverude, M., Physics. Research on student learning of magnetism. Funded by McNair Fellowship. One undergraduate student

Loverude, M., Physics, and **Monteyne, K.** and **Gonzalez, B.**, Chemistry and Biochemistry. A mental models assessment system for probing student models of concepts in the physical sciences. Funded by CSUF Dept. of Chem and Biochem, proposal to NSF pending. Undergraduate students from chemistry

Tifrea, I., Physics. Nuclear Spin Dynamics in Low Dimensional Semiconductors. Funded by Research Corp. One undergraduate student

Tifrea, I., Physics. Transport Properties of Quantum Dot Arrays. One graduate student

Wanser, K., Physics. Fiber Optic Sensor Measurement of Stretched Exponential Viscoelastic Relaxation. One undergraduate student, one graduate student

Wanser, K., Physics. Non-Contact fiber optic displacement sensor measurement of Metallic Glass Magnetostriction. One undergraduate student

Wanser, K., Physics. Etalon effects in angle dependent optical transmission measurements. One graduate student

Wanser, K., Physics. Single Oscillator with Two Centers of Force: A Model for the Origin of Negative Thermal Expansion and Structural Phase Transitions. Two undergraduate students

Wanser, K., Physics. New Mechanism for Cell Phone and Wireless Induced Biological Effects: CSUF Electrosmog Environment. Two undergraduate students

Gonzalez, B., Chemistry and Biochemistry. CAREER: Exploring Representations of Structure: The Impact of Visualization on Conceptual Understanding in Chemistry. Funded by NSF. Nine undergraduate students, two graduate students

Gonzalez, B., Chemistry and Biochemistry. Exploring Interactivity and Dimensionality in an Animation Prototype for Visualizing Molecular Geometry and Polarity. Funded by NSF/GRC. Two undergraduate students

Gonzalez, B., Chemistry and Biochemistry. Enhancing Student Learning By Incorporating NMR Spectroscopy into the General and Organic Chemistry Curriculum. Funded by NSF. One undergraduate student

Gonzalez, B. and **Monteyne, K.**, Chemistry and Biochemistry, **Loverude, M.**, Physics. A Cross-Disciplinary Investigation of Student Understanding of the Particulate Nature of Matter. Funded by CSUF GE Committee. Four undergraduate students

Hudson, P., Chemistry and Biochemistry. Hygroscopic growth of aerosols. Funded by State Mini Grant. Four undergraduate students

Hudson, P., Chemistry and Biochemistry. Water uptake by films. Funded by FDC. Four undergraduate students

Hyland, C., Chemistry and Biochemistry. Aziridines. Funded by PRF type G. Ten undergraduate students, two graduate students

Hyland, C., Chemistry and Biochemistry. Catalysis. Funded by Res Corp Cottrell. Ten undergraduate students, one graduate student

Hyland, C. and Meyer, C., Chemistry and Biochemistry. HHMI Scholars. Funded by HHMI. Two undergraduate students

Hyland, C., Chemistry and Biochemistry. MARC Scholars. Funded by NIH. Two undergraduate students

Hyland, C., Chemistry and Biochemistry. LSAMP. Funded by NSF. One undergraduate student

Kantardjieff, K., Chemistry and Biochemistry. Structure-based design of selective butyrylcholinesterase inhibitors as Alzheimer's therapeutics. Funded by industry. Six undergraduate students, one graduate student

Kantardjieff, K., Chemistry and Biochemistry. Structure-guided modeling of zinc transfer in rabbit metallothionein. Two undergraduate students

Kantardjieff, K., Chemistry and Biochemistry. Structure determination and analysis of bacterial cytochromes c'. Funded by department. Five undergraduate student, one graduate student

Kantardjieff, K., Chemistry and Biochemistry. Structure guided design of enantioselective SSCR for synthetic advantage. Funded by department. Five undergraduate students, one graduate student

Kantardjieff, K., Chemistry and Biochemistry. Synthesis and structural characterization of chiral tethered cyclopentadienyl-amide-alkoxide complexes. Funded by NSF. Four undergraduate students

Kantardjieff, K., Chemistry and Biochemistry. Structural biology of the embCAB gene products in *M. tuberculosis*. Funded by CSUPERB/NIH. Two undergraduate students, two graduate students

Kantardjieff, K., Rogers, H., Monteyne, K., Chemistry and Biochemistry. PRISSM. Funded by Boeing. Variable number of undergraduate and graduate students

Kantardjieff, K., Chemistry and Biochemistry. GRENACCHE - Grid enabled applications for computation in chemistry. Funded by department, MARC. Two undergraduate students, two graduate students

Kantardjieff, K., Chemistry and Biochemistry. G2 - grand grid project. Variable number of undergraduate and graduate students

Kantardjieff, K., Chemistry and Biochemistry. Structure determination and guided modeling of GES-1 extended spectrum beta-lactamases. Funded by DOE. Two undergraduate students

- Kantardjieff, K.**, Chemistry and Biochemistry. Structure determination and analysis of chicken LDH/complexes. Funded by NSF/some dept funds. Variable number of undergraduate students, one graduate student
- Li, Z.**, Chemistry and Biochemistry. Kinetics. Funded by NSF. Three undergraduate students, three graduate students
- Li, Z.**, Chemistry and Biochemistry. Glenn Nagel Scholar Research. Funded by Scholarship Fund. One undergraduate student
- Linder, M., Meyer, C., Hyland, C., Stoddard, J., Hudson, P., Rogers, H., de Lijser, P., Monteyne, K.**, Chemistry and Biochemistry. Summer REU. Funded by NSF. Ten undergraduate students
- Linder, M.**, Chemistry and Biochemistry. ICP-MS, MALDI. One undergraduate student, three graduate students
- Meyer, C.**, Chemistry and Biochemistry. Regulation of Diverse bacterial ADPGlucose Pyrophosphorylases. Funded by NSF. Fifteen-20 undergraduate students, seven graduate students
- Meyer, C.**, Chemistry and Biochemistry. Structure-function and modeling studies of ADPGlucose Pyrophosphoraylases. Funded by NSF. Three undergraduate students
- Meyer, C.**, Chemistry and Biochemistry. Affinity capillary electrophoresis studies of ADPGlucose Pyrophosphorylases. Funded by NSF. Four undergraduate students
- Monteyne, K.**, Chemistry and Biochemistry. Lab curriculum development. Two undergraduate students
- Rasche, M.**, Chemistry and Biochemistry. Methanopterin Biosyn. Funded by NSF. Ten undergraduate students, two graduate students

Student-Faculty Collaborative Research Programs

Minority Access to Research Careers (MARC) — Provides training to honors undergraduate students in scientific research with the goal of increasing the number of students selecting graduate studies and research careers in the biomedical sciences. These programs typically involve an enriched curriculum and a summer research experience at another institution in addition to research at CSUF.

MHIRT: Minority International Research Training — Supports research for both graduate and undergraduate students in the international research community and to increase the cooperation between foreign scientists and US scientists. Students will participate in a ten-week research experience abroad.

REU: Research Experience for Undergraduates — Open to all chemistry and biochemistry undergraduate students in their sophomore or junior year who are actively encouraged to develop their research skills and pursue advanced degrees and careers in chemistry and biochemistry research. The program runs for ten weeks during the summer and takes applications from undergraduates across the country. Women, late bloomers, and minorities are particularly encouraged to apply.

Southern California Ecosystems Research Program (SCERP) — Provides training to undergraduate students in scientific research with the goal of increasing the number of

students selecting graduate studies and research careers in the environmental sciences. This scholarship program is for undergraduate students interested in environmental biology and ecology. Participants must have freshman, sophomore or junior standing as a biology major.

Louis Stokes Alliance for Minority Participation (LSAMP) — Increases the graduation rates and preparation of targeted under-represented ethnic groups in the sciences, engineering or math. Preparation for and participation in undergraduate research is a key component of this program.

Howard Hughes Medical Institute Undergraduate Research Program (HHMI) — Provides our selected students an intensive biomedical research experience in faculty-mentored laboratories with the goal of increasing the number of students selecting PhD or PhD/MD graduate studies and research careers in the biomedical sciences. This program also targets outreach to high school and community college students who will conduct research in CSUF laboratories.
