

California State University, Fullerton
Department of Mathematics
presents:

ANALYSIS WORKSHOP

May 4–6, 2011

This is the first workshop in a series of workshops jointly organized by California State University in Fullerton and Urgench State University (Uzbekistan). The aim of the workshops is to establish research collaborations between mathematicians from Uzbekistan and the United States. The second workshop is to take place in August 2011 in Urgench. Topics of the workshops include but not limited to the theory of functions of several complex variables, geometric function theory, analysis on metric spaces, Gromov hyperbolic geometry, potential theory, quasianalytic functions, mathematical physics, analytical dynamics and optimal control.

Organizers

Bakhrom Abdullaev
(Urgench State University)

Zair Ibragimov
(California State University, Fullerton)

Invited Speakers

Bakhrom Abdullaev
(Urgench State University)

Behcet Acikmese
(Jet Propulsion Laboratory)

Alfonso Agnew
(California State University, Fullerton)

Dilmurat Azimov
(University of Texas at Austin)

Alain Bourget
(California State University, Fullerton)

Zafar Ibragimov
(Urgench State University)

Sevdiyov Imomkulov
(Novoi State Pedagogical Institute)

Hassan Yousefi
(California State University, Fullerton)

Sponsored by:

The College of Natural Sciences and Mathematics with additional support by an Incentive Intramural Research grant from the Office of Grants and Contracts at CSUF.
