There are a total of 188 Smart Classrooms and lecture halls on campus. All 8 colleges have access to these General Use Smart Classrooms.

**SMART CLASSROOM OVERVIEW**

Smart Classrooms are campus classrooms that contain AV and computing sources, i.e., a Windows computer, an AppleTV, and two video input cables (HDMI and VGA) to connect a laptop to the classroom AV system, and supporting peripheral equipment, i.e., a local monitor, a wireless keyboard and mouse, an Ethernet cable to connect your laptop computer to the campus network, and a touch panel to allow you to route any AV or computing source to the local monitor and projector. Select classrooms may also have a Macintosh computer available (currently in VA classrooms and MH121).

In most general use classrooms, the AV and computing equipment is contained in lectern near the front of the classroom. In larger lecture halls, the AV equipment is located in a separate locked AV closet or wall cubby; the computing sources and touch panel are the only equipment at the lectern. New users should complete Smart Classroom training in order to become proficient in the identification and operation of classroom AV systems, and the troubleshooting common issues that may impact class time.

**NOTE:** Only lecturers assigned to teach in a particular classroom will have access to the AV and computing equipment. Students are prohibited from logging into a classroom PC and must have an instructor or college department representative present who is familiar with the classroom AV system present in order to operate a classroom AV system.

**SMART CLASSROOM CLASSES**

Links to the Smart Classroom online classes can be found here: http://www.fullerton.edu/ittraining/other/smartclassroom/index.asp

**Basic Classroom AV Systems User’s Guide Training**

This class covers: what AV and computing equipment is available in a general use classroom, how to operate the equipment, how to troubleshoot common operation issues, and where to find personal in-classroom assistance. This class is available online.

**Large Lecture Hall Smart Classroom Training**

This class covers the usage of smart classroom equipment in the following large lecture halls: H-110, H-123, KHS-199, LH-308, MH-121, RGC-013, UH-252, VA-113. **Users should contact Academic Classroom Support at 657-278-2621 for assistance with taking this class.

**Mihaylo Hall Smart Classroom Training**

This class covers the usage of smart classroom equipment in the Mihaylo Hall building. This class is available online. For questions and support on Mihaylo Hall lecture halls, please contact CBE Classroom Support at 657-278-7009.
