UPCOMING EVENTS

What Is DVC all about?

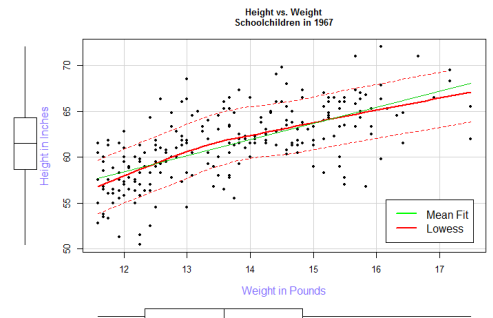

Mission

The purpose of DVC is to provide collaborative professional growth through the exploration of data visuals. Alongside the faculty at CSU Fullerton, we plan to provide interdisciplinary networking opportunities with industry leaders and be a resource hub for all things visual in the data science world. A picture is worth a thousand words, and it's our goal to capture every one.

Hall every other Friday at 5:00 PM throughout the semester. Currently our home base is in MH-380. That is subject to change from semester to semester. See our website calendar for official times and locations of club meetings.

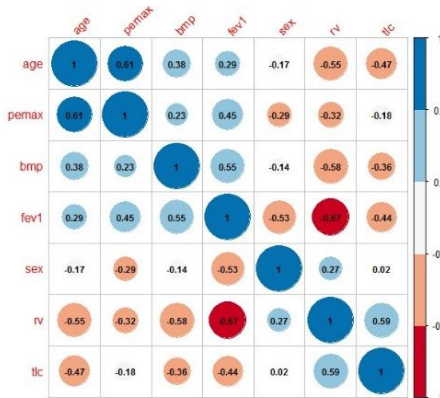

Club Member Perks

All club members get access to code shared in presentations and demonstrations. Club meetings are tailored to the needs of our members. When specific topics arise that are useful for current coursework or projects, DVC works with individuals and provides that knowledge for the collective whole. DVC also aides in training CSUF students who wish to enter research competitions. The club also host social outings, which include BBQ's and dinner events, and members are invited to participate in a variety of sporting tournaments against other clubs on campus, such as beach volleyball and bowling nights.

Introduction to R Workshop

On Friday February 16th, DVC and CCAM will be hosting an Introduction to R and Data Visualization Workshop.

Meeting Times and Locations

Typically, DVC meets in McCarthy

DVC works with Rguroo

On Friday February 23rd, with the help of Rguroo, DVC is spreading statistical and plotting power to disciplines outside the statistics world with the click of a mouse.
