Through generous donor support, the College of Natural Sciences and Mathematics funded more than 50 undergraduate student researchers in 2016-17 through $100,000 raised during the inaugural NSM Gift Challenge.

Alumnus Dan Black ’67 and his wife, Kathy, the inaugural sponsors, were impressed with the level of support the effort generated for undergraduate students and have reissued the challenge in 2017-18. The couple will match all donations 1:1 — up to $50,000.

Your individual gift of any amount — up to $10,000 — will be matched 1:1 between July 1, 2017, and June 30, 2018. This challenge is a way to double the impact of your gift.

Individual gifts of $1,000 or more can be designated to a specific NSM department or to a program’s research needs. Contact us for more information.

Benefits of your philanthropic investment in undergraduate research include:

• Preparing students for the rigor and challenges of advanced scientific study
• Increasing the number of undergraduate research studies presented at conferences and published in journals
• Creating funded opportunities to allow students to focus on their academics
• Preparing workforce-ready scientists and mathematicians
• Promoting the unique faculty-mentored undergraduate research experience offered in NSM

Make your gift to the College of Natural Sciences and Mathematics today. Visit giving.fullerton.edu/nsmgiftchallenge.
