College Review Criteria for Intramural Grants
COTA

Student Involvement:
Describe how the project will include student participation, either as a research partners, collaborative artists or performers working directly on the project. Involvement could also include students being exposed to the outcome of the research through attending an exhibition, reading (as in a textbook) or attending a public performance.

Impact:
Describe the research project’s overall benefit, or contribution, to student learning; to the applicant’s creative and scholarly development; and to his/her Department, College, and the University.

Budget
Provide a detailed budget for your project with itemized expenses and sources of potential income.

Innovation
Describe how the project is unique in terms of its contribution to the field, subject matter, or approach to its content. In what ways does the project break new ground or expand the boundaries of your creative discipline?

Coherence/Feasibility:
Explain how you will use specific scholarly and creative resources within a feasible timeline to achieve the goals of the proposed project.

Collaboration:
Describe how the proposed activity will create interdisciplinary and trans-disciplinary collaborations on campus, within the community or with other institutions.
