OUTCOME
Students will be able to develop leadership skills related to their involvement within their organization.

OUTCOME SUPPORTS
☑ University: Goal 1
☑ Division: Goal 1
☐ Department:
☑ Other: ULG 6

OUTCOME TYPE
☐ Performance Outcome
☑ Student Learning Outcome

ASSESSMENT APPROACH
☐ Direct assessment
☑ Indirect assessment

DATA COLLECTION METHODS
- Surveys, self-assessment

METHODS AND MEASURES
Student Life and Leadership (SLL) will conduct surveys in many programs and services offered to students engaged in SLL development opportunities. For the 2016-2017 academic year, SLL will collect data from the following:
- Fraternity and Sorority Life- Nu Mu Education
- Discoverfest (Q18 in spring)
- Fraternity & Sorority Life Community Assessment

SLL surveys will measure if students feel supported in their leadership development and if students feel they gained leadership skills.

CRITERIA OF SUCCESS
- 75% of students gained leadership skills that will assist them in the involvement within their organization.

DATA COLLECTION AND ANALYSIS
Surveys were provided to student participants involved with programs within Student Life & Leadership including Fraternity & Sorority Life’s New Membership Education (number of respondents= 40 for spring 2017), Discoverfest in fall 2016 and spring 2017 semester (number of respondents=215 for fall 2016, number of respondents=66 for spring 2017) and Fraternity & Sorority Life Community Assessment (number of respondents=298 for spring 2017). The surveys were administered at the end of the activities and included both qualitative and quantitative questions.

Overall, 90.30% of students gained leadership skills that will assist them in the involvement within their organization.
- Fraternity and Sorority Life- Nu Mu Education
  - 93.5% of students agreed that they developed leadership skills related to their involvement at the institution. These leadership skills include, but are not limited to, identifying binge drinking amongst their peers, identifying support services for victims of sexual assault, and identifying hazing practices.
• Discoverfest
  o 90.01% of respondents felt that they gained leadership skills. These leadership skills include building connections, marketing and advertising, networking, public speaking, and recruitment.

• Fraternity & Sorority Life Community Assessment
  o 87.40% of respondents agreed that they developed leadership skills related to their involvement in their organization. These skills include assuming responsibility, ability to coordinate events, motivate others, and meeting deadlines.

IMPROVEMENT ACTIONS
SLL provides and supports various opportunities for students to develop skills that will assist in their campus involvement. With regards to gaining leadership skills, not only did student life meet the criteria of success, but is excelling in this area. Areas of improvement could include incorporating more programs and opportunities that the department is responsible for, however this may be difficult being that the department is quite large. Capacity needs to be explored and discussed. SLL can also look into collecting data for other skills that students may be developing and explore ways to gather direct data.
