The WoMen’s Center, Sexual Assault Prevention Program (SAPP)
SAPP provides instructional programming to reduce dangerous behaviors and
interactions that might result in sexual assault.
Learning Domain: Social and Civic Responsibility
Summary of project: Pre and Post-tests will be completed by approximately 300
freshman students in fall semester 2011. The test is an eleven question, multiple choice
tool that will be administered before (pre) and after (post) an in-class sexual assault
prevention workshop. Additionally, a six (6) question learning objective questionnaire
will be completed following the program. Data from paper and pencil tests will be
reported by April 30, 2012.
Learning Outcome Statement:
CSUF students who participate in the Sexual Assault Prevention Program will be able to:
1. Define sexually aggressive behavior.
2. Identify the dangers of sexually aggressive behavior
3. Understand when and how to intervene in a potentially dangerous situation while
   maintaining their personal safety.
Data collection timeframe: Fall 2011 September - December
Data collection method: Pre/Post Test/Learning Objective Outcome Scale
I am working with StudentVoice: With the aid of StudentVoice personnel testing
documents were uploaded to StudentVoice. Conversation with Joe Levy has begun as we
embark on the second year of this assessment.
Questions and Professional Development: I have no questions at this time. An in-
service for my staff would be welcome.
