- B. **From Prof. Nathan Carr (submitted April 29, 2024):** I am writing to suggest that the Level 1 charging spaces in the East Side Parking Structure and Lot A South (between Parking and the Children's Center) be reserved for EV charging only, and no longer be available to vehicles that are not plugged in. The Level 2 chargers can be a hassle to wait for, but often slow charging at a Level 1 station would be enough, especially for faculty or staff who are here all day. (Note that Lot A South almost always has an open space, but for anyone working on the other side of campus, being able to plug in without a 15-minute hike to and from the office would be a serious relief.)
- C. Parking congestion on campus

VI. ADJOURNMENT
