COVID-19
Coronavirus
FAQs

Follow us for more info @titanwell
How is it transmitted?
Coughing, sneezing and speaking. You can protect yourself by avoiding crowds and staying at least six feet away from other people.

Is it just in China?
No, COVID-19 started in China, however it has spread globally. There are currently many countries affected around the world. For more up-to-date information go to https://www.cdc.gov/coronavirus/ or https://www.who.int/health-topics/coronavirus

What are the common symptoms?
• Dry cough, fever, difficulty breathing, fatigue, muscle aches
• Many have mild symptoms, and most cases have no symptoms
• Symptoms typically show within 14 days of infection

How do you manage symptoms?
Treat COVID-19 symptoms as you would the flu, by staying hydrated, using over-the-counter pain relievers and contacting your healthcare provider if symptoms worsen.

Is there a cure?
Currently there is no "cure," and in most people the virus simply runs its course. However, studies are underway for a vaccine. COVID-19 is a rapidly evolving situation. If you want more information, follow the link below: fullerton.edu/coronavirus
