What: The ESRT program provides an opportunity for CSUF undergraduate and graduate students studying Biology, Geology, Earth Science, Mathematics, Chemistry, Biochemistry or closely related field, to participate in collaborative research with Thai faculty and students at Chiang Mai University, Thailand for 6 weeks during summer 2014.

Who: Ten undergraduate and/or graduate students will be selected for participation. Undergraduate students must have 12 units completed in their major by summer 2014. Participants must register for 2 units of independent study during spring 2014. Applicants should have appropriate independent research experience or have sufficient laboratory and/or field experience to ensure productive involvement. Participants will be selected on the basis of academic qualifications, recommendations, ability to adapt to a different culture and climate, ability to work in a team, enthusiasm for international education and research, and the availability of projects and mentors in their selected field.

When: Tentative dates are June 12 – July 31, 2014.

Cost: The Associate Students Instructionally Related Activities (IRA) Fund provides support for round trip airfare, local transportation, a substantial portion of lodging, and travel insurance. Students should be prepared to contribute a minimum of $1000 to cover food, incidental expenses, tips, and to supplement the cost of lodging and activities. Scholarships may be available to qualified students.

Applications Due Nov. 1, 2013
