Voluntary Product Evaluation Template (VPAT)

Date: June 18, 2013

Name of Product: OmniUpdate's OU Campus

Contact for more Information: Michael Molina, V.P. of Sales, OmniUpdate, Inc.
michael@omniupdate.com or 805-484-9400 ext: 208

Refer to the **ITIC Best Practices** for filling out the following form.

Summary Table		
Criteria	Supporting Features	Remarks and explanations
Section 1194.21 <u>Software Applications and Operating Systems</u>	Supports	OU Campus is a Web-based Internet application which contains an Image Editor Applet. This section applies only to its Image Editor Applet in support of Section 1194.22 (m)
Section 1194.22 <u>Web-based Internet Information and applications</u>	Supports with Exceptions	OU Campus is a Web browser-based application, and therefore inherits the accessibility features of supported Browsers and OS (Operating Systems) that host the application and Browser.
Section 1194.23 <u>Telecommunications Products</u>	Not Applicable	OmniUpdate's OU Campus is not a telecommunications product as defined here.
Section 1194.24 <u>Video and Multi-media Products</u>	Not Applicable	OmniUpdate's OU Campus does not use multimedia except as covered in section 1194.21 and 1194.22.
Section 1194.25 <u>Self-Contained, Closed Products</u>	Not Applicable	OmniUpdate's OU Campus is not a self-contained, closed product as defined here.
Section 1194.26 <u>Desktop and Portable Computers</u>	Not Applicable	OmniUpdate's OU Campus is software and web-based application as defined under section 1194.21 and 1194.22. This section does not apply.
Section 1194.31 <u>Functional Performance Criteria</u>	Supports	Details below.
Section 1194.41 <u>Information, documentation, and support.</u>	Supports	Details below.

Section 1194.21 Software Applications and Operating Systems		
* Refer to (http://www.access-board.gov/sec508/guide/1194.21.htm) for details on the guidelines listed below.		
Criteria	Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Supports	Applies to OU Campus Image Editor Applet only in support of Section 1194.22 (m)
(b) Applications shall not disrupt or disable activated features of other	Supports	Applies to OU Campus Image Editor Applet only in support

products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.		of Section 1194.22 (m)
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Supports	Applies to OU Campus Image Editor Applet only in support of Section 1194.22 (m)
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	Supports	Applies to OU Campus Image Editor Applet only in support of Section 1194.22 (m)
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Supports	Applies to OU Campus Image Editor Applet only in support of Section 1194.22 (m)
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Supports	Applies to OU Campus Image Editor Applet only in support of Section 1194.22 (m)
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Supports	Applies to OU Campus Image Editor Applet only in support of Section 1194.22 (m)
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Supports	Applies to OU Campus Image Editor Applet only in support of Section 1194.22 (m)
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a	Supports	Applies to OU Campus Image Editor Applet only in support of Section 1194.22

response, or distinguishing a visual element.		(m)
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Supports	Applies to OU Campus Image Editor Applet only in support of Section 1194.22 (m) No such adjustment is permitted.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Supports	Applies to OU Campus Image Editor Applet only in support of Section 1194.22 (m) No such flashing or blinking objects are used.
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supports	Applies to OU Campus Image Editor Applet only in support of Section 1194.22 (m) No forms are used.

Section 1194.22 Web-based Internet Information and applications * Refer to (http://www.access-board.gov/sec508/guide/1194.22.htm) for details on the guidelines listed below.		
Criteria	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Supports with Exceptions	Editable regions and toolbars provide text equivalents for all non-text elements (icons). Certain graphics, for example those for the selection of a new type of page, do not currently have text element content. Efforts to eliminate cases like this are underway.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Supports	OU Campus does not use multi-media presentations as part of its browser interface.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supports	No information is solely conveyed with color.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supports	While style sheets may be used internal to OU Campus, this is done on the server and

		not by the Browser Interface. Any Information displayed in the Browser Interface does not require a style sheet.
(e) Redundant text links shall be provided for each active region of a server-side image map.	Supports	Image maps are not utilized in the Browser Interface.
(f) Client-side Image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Supports	Image maps are not utilized in the Browser Interface.
(g) Row and column headers shall be identified for data tables.	Supports	Headers in the Browser interface are so identified.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Supports	Appropriate HTML markup is present in relevant tables.
(i) Frames shall be titled with text that facilitates frame identification and navigation.	Supports	Frames, where used, are compliant.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supports	No flickering page elements are used.
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	Supports	Compliance is through primary means.
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Supports	AJAX and Javascript elements, where used, are compliant.
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with 1194.21(a) through (l).	Supports	No plug-ins or other applications are required to interpret page content. An Integrated Image Editor applet supports 1194.21 (a) through (l). See Section 1194.21
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements,	Supports	All OU Campus forms support AT as required.

and functionality required for completion and submission of the form, including all directions and cues.		
(o) A method shall be provided that permits users to skip repetitive navigation links.	Supports	OU Campus is presented in an action panel with a single level of navigation. There is nothing to skip.
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Supported	No timed responses are required in the Browser Interface.

Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.

Section 1194.31 Functional Performance Criteria		
Criteria	Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Supports	Supports reading by Assistive Technologies.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Supports	Browsers and OS provide screen magnification.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided.	Supports	The product has no audio content.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Supports	The product has no audio content.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Supports	No user speech is required.
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous	Supports	No fine motor control or simultaneous actions other

actions and that is operable with limited reach and strength shall be provided.

than using a standard web Browser is required.

Section 1194.41 Information, documentation, and support

Criteria	Supporting Features	Remarks and explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge.	Supports	Product documentation is completely accessible using a standard Browser interface. Underlying Browsers and Operating Systems support Assistive Technology such as screen readers.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supports	The product's documentation provides links for Accessibility information.
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supports	OmniUpdate provides full Customer Support via keyboard accessed media such as email, text, and chat and accommodates customers with options important to those with disabilities.
