

TECHNOLOGY USE & SECURITY POLICY #103

Policy Administrator:	Executive Director or designee
Authority:	Section 89900 of the Education Code and Section 42400 of Title 5 of the California Code of Regulations
Effective Date:	06/11/09
Updated:	04/25/19 (approved 06/20/19)
Cross References:	

Policy Statement: The CSU Fullerton Auxiliary Services Corporation (ASC) computing equipment and resources are owned by the ASC and administered through the company-wide IT department. These resources are provided to the employees of the ASC to help them support the community at Cal State Fullerton. The Technology Usage and Security Policy spells out the general principles on the appropriate use of equipment, software and networks, and applies to all employees, contractors and vendors of the ASC.

Responsibilities: All employees, contractors and vendors of the ASC and its divisions who use its computing and information resources must act responsibly. Every user is responsible for the integrity of these resources. All users of ASC-owned resources must respect the rights of other computing users, and respect all pertinent licenses and agreements.

The ASC reserves the right to limit, restrict or extend computing privileges and access to its information systems. These resources are to be used for ASC business related activities, and may not be used to conduct non-ASC business. All programs installed on ASC computers must be approved by the IT department, under the authority of the ASC Administrative division. The IT Department will evaluate all software as to its usefulness, and necessity for conducting ASC business, and is responsible for providing support on approved products.

Users of ASC's computing resources have the following responsibilities:

- Use only those computers, computer accounts and software for which you have authorization.
- Use your desktop computers and the mainframes for ASC-related projects only.
- You are responsible for all computing activity conducted using your account credentials. Do not share computer accounts. If someone else learns your password, change it immediately.
- When you are done with your tasks on the system, log off and do not let anyone else work under your log-on and password.
- Report unauthorized use of your account to the IT department immediately.
- Cooperate with system administrator requests for information about computing activities. Under certain unusual circumstances, a system administrator is authorized access to your

computer files. E-mail messages and all other computer stored data are considered business records, and can be subpoenaed. IT department personnel will have access to this information only if authorized by ASC management.

- Unnecessary use of computing resources should be avoided. This would include excessive printing, downloading and transferring of large files either from the internet or a server, and use of the Internet for extended period of times for personal reasons. Employees should exercise good judgment in the use of e-mail distribution lists. The forwarding or sending of messages such as e-mail chain letters, jokes and other non-business related mail should be avoided as they, in addition to being an inconvenience to the addressees, also clutter the e-mail system, slowing down the normal flow of business traffic.
- Please take care of the equipment issued to you. Do not move the equipment from its original installation location. This might cause undue strain on the wiring and peripherals attached to the machine. All physical moves need to be approved and assisted by the IT department. Items like stickers, pen markings and others that would restrict air circulation to the equipment are discouraged. This equipment is for business use and should look like a business machine.

Privacy & Disclosure Statement: E-mail and computer systems are provided to facilitate ASC business.

- All messages and other communications generated through and/or stored on these systems are considered business records.
- Employees who use e-mail and/or computer systems should understand that information stored on these computers cannot be considered confidential or private.
- The company reserves the right to access any e-mail or other computer-stored information at any time in the service of its legitimate business interests.
- Employees should understand that the delete function of the company's e-mail and computer systems does not necessarily make the message or other information disappear. While deletions may occur at the user level, copies may remain on one of the many systems back-up files.
- Non-compliance with and/or breach of any of the stated policies in this document may result in legal actions against the responsible party, including but not limited to termination of employment or contract. Furthermore the user may be liable for any damages incurred by the ASC due to their actions.

Acknowledgement: By signing below, I state that I have read and understood this policy and agree with the Privacy and Disclosure Statement.
