

Security Day @ ECS

Friday, November 15, 2013, 8:30—1:40 PM
Engineering Building E-201

- **Free breakfast, lunch, and coffee**
- **Industry Presentations:** security experts from National Research Labs and industry will provide their perspectives on the state-of-the-art in research and development
- **Faculty/Student Presentations:** faculty and students will showcase research projects and discuss curriculum development
- **Panel Discussions:** questions and answers give you an opportunity to find out what you need to learn to build a career in computer security
- **Planning:** Center for Cyber Security at Cal State Fullerton

Michael Skroch is a **Strategic Capabilities Deputy** at Sandia. Much of his work has been at the multi-disciplinary environment of Sandia National Laboratories, but includes work at DARPA, the Pentagon, and other locations.

Ron Williamson is a **Senior Engineering Fellow** at Raytheon Network Centric Systems, has more than 30 years of experience in aerospace and commercial systems and software engineering. He is a former adjunct professor at the University of Maryland, College Park Graduate School.

Mikhail Gofman is an **Assistant Professor of Computer Science**. His research focuses on access control policies, virtualization security, web security, and biometrics. He published in top security venues, taught security for four years, and is actively working to expand his research agenda and develop new security courses.

Yun Tian is an **Assistant Professor of Computer Science**. Her research interests include storage security, cloud security, distributed computing, parallel and high performance computing, and computer science education. Dr. Yun Tian is recruiting undergraduate and graduate students who have interest in computer security.
