

## Emergency Response Information

EVACUATION DRILLS and other emergency exercises provide information and practice in responding to emergency situations. By being prepared, everyone becomes a part of the success of responding well during crisis situations.

Twice each year, once in the spring and once in the fall, CAMPUS-WIDE EVACUATION DRILLS are conducted. Regardless of the reason, all evacuations must be conducted using the same procedure: ***Everyone must leave the structure as quickly and safely as possible, then move at least 50 feet away from every structure into designated evacuation areas.*** Note: The Quad Area is not an evacuation area. Everyone can help by assisting Building Marshals to usher guests and other personnel to their evacuation areas.

For more information regarding emergency preparedness, go to <https://police.fullerton.edu/emergency-preparedness/index.html>

EMERGENCY NOTIFICATIONS are made primarily through our electronic system that sends emails, texts and voice messages to all faculty, staff and students. So, keep your contact information up to date. To update it, log into your CSUF portal and view your Settings. Emergency messages can also be provided through our on-campus public address system, the University's main web page ([www.fullerton.edu](http://www.fullerton.edu)) and by calling the 24-hour public information line: 657-278-4444, or toll-free: 877-278-1712.

If you have any questions about our campus emergency or evacuation procedures, please contact the Office of Emergency Management & Continuity at 657-278-7364.
