
Dr. Kiran George

Professor and Vice Chair, Electrical and Computer Engineering
California State University, Fullerton

Tel: 657 278 2640, Email: kgeorge@fullerton.edu

Website: <http://www.fullerton.edu/ecs/faculty/kgeorge/>

EDUCATION

Ph.D. Wright State University, Dayton, Ohio – 2007

M.S. Wright State University, Dayton, Ohio – 2002

B.S. Bharathiar University, India – 1999

APPOINTMENTS - RESEARCH, TEACHING and SERVICE

- 08/2022 – present **Vice Chair**, Electrical and Computer Engineering Department
California State University, Fullerton
- Schedule Computer Engineering courses for each semester.
 - Enrollment management for Computer Engineering courses.
 - Teaching assignment management for Computer Engineering faculty.
 - Advise students in the 4-year Integrated BS-MS program.
 - Coordinate ABET assessment efforts for Computer Engineering courses and collect assessment data.
 - Lead and facilitate curricular revisions.
 - Approve extramural proposals through Cayuse.
 - Submit budget requests for computer engineering senior design projects and approve design project expenses.
- 01/2014 – 08/2022 **Program Coordinator**, Computer Engineering Program,
California State University, Fullerton
- Planned and managed budget, software and hardware needs of Computer Engineering
 - Planned course offerings and faculty teaching assignments.
 - Conducted performance review for faculty (RTP) and staff.
 - Coordinated various department committee activities including Faculty Search Committee, Continuous Improvement Committee, Curriculum Committee, etc.

- Coordinated engineering accreditation efforts including accreditation visit planning, collection of direct and indirect assessment, writing the Self-Study report.
- Served as faculty advisor for students in the 4 year Integrated BS-MS program.
- Reconciled P-Card expenditure and approved ISA and RA hours.
- Conducted NSO and TSO, coordinated outreach activities including *Welcome to CSUF day*, Experience CSUF day, lab tours, etc.

08/2016 – present	Professor , Computer Engineering Program, California State University, Fullerton
08/2013 – 08/2016	Associate Professor , Computer Engineering Program, California State University, Fullerton
08/2007 – 07/2013	Assistant Professor , Computer Engineering Program, California State University, Fullerton
06/2003 – 06/2007	Research Assistant , Dept. of Electrical Engineering, Wright State University, Dayton, Ohio
06/2003 – 06/2005	Graduate Project Assistant , Receiver-On-a-Chip (ROC) project, funded by Air Force research lab (AFRL)
06/2003 – 08/2003	Graduate Teaching Assistant , Dept. of Electrical Engineering, Wright State University, Dayton, Ohio
09/2000 – 06/2003	Graduate Teaching Assistant , Dept. of Management Science and Information Systems, Wright State University, Dayton, Ohio
03/2000 – 08/2000	Teaching Assistant , Computer Literacy and Office Automation class Dept. of Computer Science, Wright State University, Dayton, Ohio
03/2000 – 05/2000	Tutor , University Disability Center, Wright State University, Dayton, Ohio
03/1999 – 02/2000	Trainee , Cochin Refineries, India

RESEARCH INTERESTS

- **Brain-Computer Interface (BCI) Technology:**
Research on BCI based cognitive system architecture:
 - § Sensing and Decoding of Visual Stimuli using Commercial Brain Computer Interface Technology with a Cognitive Level Function
 - § Automated Sensing, Interpretation and Conversion of Facial and Mental Expressions into Text Acronyms using Brain-Computer Interface Technology

- **Biomedical Research:**

- § Design, Implementation and Evaluation of a Brain-Computer Interface Controlled Mechanical Arm for Rehabilitation

- § Low-cost Assistive technology devices

- **Wideband Digital Receivers:**

- § High-resolution spectral measurement for digital wideband receivers through amplitude comparison and empirical frequency estimation

- § Modular test RF instrumentation and measurement for a hybrid computing digital wideband receiver

- § Design and implementation of intelligent pulsed radar receiver (collaborative project with Mercury Systems)

HONORS AND AWARDS

2021 University Faculty Marshal for Commencement

2020 *Outstanding Professor* award

2019 College of Engineering and Computer Science Distinguished Faculty Marshal

2017 Recipient of *L. Donald Shields Excellence in Scholarship and Creativity Award*

2012 Recipient of *NSF Faculty Early Career Development (CAREER)* award

2012 Recognized for Service
(Faculty Recognition: Scholarly & Creative Activity event, April 2012)

2011 Recognized for Sponsoring Student Research and Creative Activities
(Faculty Recognition: Scholarly & Creative Activity event, April 2011)

2010 Recognized for Outstanding Record in Scholarly & Creative Activity
(Faculty Recognition: Scholarly & Creative Activity event, April 2010)

2009 Recipient of Best Senior Design Project Advisor: Computer Engineering

2008 Recipient of Best Senior Design Project Advisor: Computer Engineering

2006 Recipient of the Dean's Award for Outstanding Graduate Student
(Ph. D. Engineering Program)

2006 Recipient of Ph.D. Engineering Scholarship, Wright State University

2003 Recipient of Competitive DAGSI Scholarship, Home Institution - Wright State

2003 Recipient of Chair's Special Recognition for Contribution, Dept. of Management Science and Information Systems, Wright State University

2002 Recipient of Chair's Special Recognition for Excellence in Teaching, Dept. of Management Science and Information Systems, Wright State University.

GRANTS AWARDED

Current Grants

- **NSF SCC-IRG grant**

[Co-PI; project duration: 3 years; \$ 1,215,370]

The project investigates the social and technical challenges of adopting sensor-based technologies, such as tele-mental health services. The project will explore the issues using a combination of surveys and an innovative "lean design" approach. Lean design refers to developing a solution in an iterative way with rapid development of prototypes that can be quickly evaluated and the lessons learned applied to the next iteration. This approach includes the community partners in the design and evaluation of technology prototypes.

- **Mercury Defense Systems research grant**

[Sole Investigator; project duration: 3 years; \$300,000]

The project involves developing a hardware-software solution that would survey the radio frequencies (RF) in an environment and classify it based on predetermined need and prior knowledge. This system, that learns with experience, will be part of airborne radar systems.

- **SoCal Gas Grant**

[PI; project duration: 1 year; \$15,000]

The objective of the project is to develop a self-sustaining carbon capturing system developed to absorb and store carbon dioxide from indoor/outdoor atmospheres leaving the air fresher. This system, in the form of an artificial tree, monitors CO2 levels continuously and absorbs excess CO2 above an acceptable level.

Past Grants

- **U.S. Department of Veterans Affairs research grant**

[PI; project duration: 2 years; \$200,000]

The overarching goal of this effort is to develop a low-cost robotic aid system that can be rapidly trained to semi autonomously perform visuospatial tasks utilized in typical activities of daily living (ADLs), and which can be easily used by visually impaired persons.

- **Cisco Digital Economy Initiative grant**

[Co-PI; project duration: 3 years; \$296,253]

The objective of the project is to develop an industry-focused IoT curriculum that will enable students graduating from this program to be competitive when applying for jobs in the local IoT industry and be productive as soon as they begin their career.

- **Keck Foundation:** BS in Engineering with Biomedical Device Engineering Option [Co-PI, \$300,000, 36 months]

The objective of the project is to develop BS in Engineering degree program with Biomedical Device Engineering option; the program is an interdisciplinary engineering program integrating medical device, assistive and rehabilitative technology research and project activity by undergraduate students, faculty mentors, and industry partners.

- **Mercury Defense Systems Research Grant** [Sole Investigator; project duration: 2 years; \$100,000]

The objective of this effort is to design and implement a signal classification algorithm capable of cognitive learning for wideband non-coherent digital receivers. The receiver is able to classify multiple simultaneous radar signals with low false alarm rate based on the signal environment, attributes and cues, while simultaneously enhancing its knowledge base through cognitive learning.

- **NSF CAREER grant** [project duration: 5 years; \$400,000]

The objective of this effort is to design and implement an intelligent wideband digital receiver capable of achieving a “near-zero” false alarm rate and a high instantaneous dynamic range by ascertaining the legitimacy of signals while categorizing and tracking incoming signals based on the signal environment, attributes, and simultaneously enhancing its knowledge base.

- **NSF S-STEM grant:** [PI; project duration: 5 years; \$598,000]

This project establishes the ECS Academic Catalyst for Excellence (ACE) Scholarship Program, a comprehensive educational support system designed to ensure student success. The scholarship will serve as a catalyst that will allow students to focus diligently on their academics. The program will award scholarships to 54 ECS students over 5 years, and leverage a well established network of ECS and University student services to support cohorts of ACE scholars majoring in ECS disciplines.

- **Disability Communication Funds** [Sole Investigator; project duration: 1 year; \$100,000]

The overarching goal of this project is to design and pilot test a low-cost Electrooculography (EOG) based electronic communication system (estimated cost to be under \$100). This system will enable ALS patients to effortlessly access the internet and communicate via e-mail, text, chat, Skype, using only eye movements, blinks and eye brow raises.

- **NSF I-Corps grant** [PI; project duration: 6 months; \$50,000]

The proposed work involves developing an innovative human-technology interface (HTI) system, which allows users to operate and interact with electronic devices solely with expressions and thoughts. The proposed HTI system, with a mobile app as the user interface, will utilize self-learning algorithms along with low-cost commercially-off-the-shelf (COTS) brain-computer interface (BCI) technology.

- **Disability Communication Funds** [Sole Investigator; project duration: 1 year; \$100,000]

The overarching goal of this project is to design and pilot test a low-cost brain-computer interface (BCI) based electronic communication system (estimated cost to be under \$150). This system will enable ALS patients to effortlessly access the internet and communicate via e-mail, text, chat, Skype, using mental thoughts, facial expressions and head movements, with minimal training.

- **NSF BRIGE grant** [Sole investigator; project duration: 3 years; \$174,795]

The project aims to advance the digital receiver technology using a hybrid high performance computing platform. The main effort of this work will center on intelligently partitioning the signal processing tasks of the receiver to optimally utilize the best features of COTS hardware accelerators. The proposed receiver design capable of high-resolution spectrum estimation will provide remarkable improvement in performance over its predecessor.

- **US Army Research Lab grant** [Sole investigator; project duration: 1 year; \$122,243]

The technical objective of this effort is to establish an innovative research that will design and implement a digital radar receiver system comprising of multiple wideband receivers to achieve an ultrawide instantaneous bandwidth (IBW) along with a high instantaneous dynamic range (IDR) and frequency resolution (FR). The proposed system, implemented on a hybrid accelerator cluster comprising of both off-the-shelf graphics processing units (GPUs) and field-programmable gate arrays (FPGAs), acquires signal data at an aggregate rate of 6GB/sec and is capable of real-time simultaneous multiple signal detection. Using several advanced DSP techniques, the proposed receiver system drastically improves its performance over its predecessor designs

- **NSF REU grant** [supplementary grant as part of NSF BRIGE grant; \$6000]

- **Engaging Students in Engineering Minigrant** [Stevens Institute subaward to CSUF; Everyday Examples in Engineering Co-Lead; project duration: 1 year; \$10,000]

EQUIPMENT DONATION

2012 Emulex Corporation (Costa Mesa, CA) **Donation** (equipment cost: \$850,000)

2011 Xilinx University Program Donation (Purchase Order # 5310-XUP-1-1U9KYM; equipment cost: \$4,243)

INDUSTRY FUNDED PROJECTS

2013 - Present “Pulsed Radar Receiver Implementation on Hardware Accelerator Platforms”
funded by **Mercury Defense Systems**, Cypress, CA (\$20000)

2013 “Brain-Computer Interface Controlled Robotic Arm”
funded by **Western Digital**, Irvine, CA (\$7500)

PATENTS

- Provisional Patent Filed: “*Facial Expression and Head Movement Based Electronic Communication Device*,” Sole Inventor; Year filed: 2015
- Provisional Patent Filed: “*Medical Alert and Communication Device*”; Sole inventor; Year filed: 2015

INTRAMURAL GRANTS/AWARDS

Funding Source	Funding Year	Proposal Title	Funding Amount
Research, Scholarship and Creative Activity	2019	Study on Mixed Reality-based Visualization and Interaction Tool	\$15000
		Integration of remote mental health services in permanent supportive housing	\$15000
FDC (FEID Grant)	2016	Integrating Augmented Reality into Engineering Courses	3 WTU release time
Instructionally Related Activities (IRA)	2016 - 2020	Multidisciplinary Senior Design Projects in Computer Engineering	\$32,000
HPRI Mini Grant	2014	Low-Cost BCI based Robotic System to Improve Quality of Life for ALS Patients	3 WTU release time
Instructionally Related Activities (IRA)	2015	Multidisciplinary Senior Design Projects in Computer Engineering	\$7500
OGC Junior Faculty Award	2014	Intelligent Indoor Air Quality and Ventilation System	\$5,000 + 3 WTU release time
Instructionally Related Activities (IRA)	2014	Multidisciplinary Senior Design Projects in Computer Engineering	\$7700
FDC (FEID Grant)	2014	Lab to Market – entrepreneurship in engineering	3 WTU release time
Instructionally Related Activities (IRA)	2013	Multidisciplinary Senior Design Projects in Computer Engineering	\$7400
FDC (FEID Grant)	2013	Integrating Service-Learning into Capstone Design Project Course in Computer Engineering	3 WTU release time
CICE Mini grant	2013	Add Service-Learning to a Course	\$1000
OGC Junior Faculty Award	2012	Neural Signal Based Assistive Technology for Spinal Cord Injury (SPI) Patients	\$5,000 + 3 WTU release time
Instructionally Related Activities (IRA)	2012	Multidisciplinary Senior Design Projects in Computer Engineering	\$7300
OGC Incentive Grant	2011	Design and Implementation of an Evolving Intelligent Telemedicine Clinical Decision Support System	\$10,000

FDC (FEID Grant)	2011	Design and Implementation of low-cost SmartBoards for engineering classrooms	\$55 + 3 WTU release time
FDC Faculty-Student Research Grant (Fall)	2011	Microchip Implementation of Brain-Computer Interface (BCI) for Biomedical Applications	\$1000
Instructionally Related Activities (IRA)	2011	Multidisciplinary Senior Design Projects in Computer Engineering	\$6,700
OGC Incentive Grant	2010	Titan Supercomputing Centre	\$10,000
FDC Faculty-Student Research Grant (Spring)	2010	Design and Implementation of a Cost-Effective Solar-Powered Fully Automated Algae Fuel Production System	\$1000
FDC Faculty-Student Research Grant (Fall)	2010	Fully Automated Solar-Powered Water Purification System - A Sustainable Water Solution	\$995
Instructionally Related Activities (IRA)	2010	Multidisciplinary Senior Design Projects in Computer Engineering	\$5,505
FDC (FEID Grant)	2010	Cost-Effective Integration of Single-Tablet Model into Computer Engineering Courses	\$423 + 3 WTU release time
ECS Dean's Office	2010	Cost-Effective Integration of Single-Tablet Model into Computer Engineering Courses	\$7,000
Accessible Technology Initiative (ATI)	2010	Adaptation of EGCP 450 Class to Meet ATI Mandates	\$1,250
ECS Dean's Office	2010	Development of High Performance Computing Lab	\$63,540
OGC (Mini-Grant)	2010	Fully Automated Solar-Powered Biodiesel Processor	\$3,000
CSUF Incentive Program award	2009	ECS ACE Scholarship program	\$2,000
FDC (Faculty-Student Research Grant)	2009	Fully Automated Solar-Powered Biodiesel Processor	\$830
FDC (Untenured Faculty Development Intramural Grant)	2009	Development of Undergraduate Course in Logic Design for Nano ICs	\$1000 + 3 WTU release time
OGC (General Faculty Award)	2009	Microchip Implementation Of High Frequency Ultrasound Transducer Array With Applications In Medicine	\$3,000
Vice President for Academic Affairs (Stipend)	2008	High Precision DSP Algorithm Development to Extend Digital Receiver Performance	\$6,500

DEPARTMENT RELATED SERVICE AND ACTIVITIES

- Vice Chair, Electrical and Computer Engineering Department (08/2022 – present)
- Program Coordinator, Computer Engineering Program (01/2014 – 08/2022)
- ABET Coordinator for Computer Engineering (2014 and 2020 Review Cycle)
- Serving as capstone senior design project advisor (2008 to present)
- Serving as undergraduate advisor (2009 – 2017)
- Serving as *4 year Integrated BS/MS Degree* program advisor
- Serving as NSO, TSO, Grad NSO advisor
- Proposed *4 year Integrated BS/MS Degree* program in Computer Engineering (Approved in Spring 2012; First cohort: Fall 2012)
- Proposed MS Degree in Computer Engineering (Approved in Spring 2012; First batch: Fall 2012)
- Faculty Advisor, IEEE Computer Society Student Chapter (2012 - 2013)
- Member, CpE Advisory Board (2007 - present)
- Member, CpE Faculty Search Committee (2012, 2013 & 2015)
- Member, CpE Continuous Improvement Committee (2010 – present)
- Member, CpE Scholarship Committee (2007 & 2010)
- Member, CpE Faculty Search Committee (2009, 2011, 2012 & 2013)
- Member, CpE Planning Committee (2012 & 2013)
- CpE DPC Chair (2014-15)
- Proposed seven new courses and revised existing courses
- Proposed and setup Very-large-scale integration (VLSI) lab
- Proposed and setup High-Performance Computing (HPC) lab
- Coordinated several outreach and synergic activities

SERVICE TO THE COLLEGE OF ECS

- Faculty Marshall – ECS Commencement (2008 - present)
- Participation in *Welcome to CSUF Day* Event (2008 - present)
- Host Professor, *Professor for a Day* Event (2008 - present)
- ECS Space Committee Member (2016)
- ECS Open House, (2008 - present)
- Member, ECS Curriculum Committee (2008 & 2009)
- Member, ECS Scholarship Committee (2009)

UNIVERSITY SERVICE

- Faculty Research Policy Committee (2016 - present)
- Academic master Plan, Member (2015 - 16)
- Steering Committee Member, Strategic Planning (co-chair: Goal 4)
- Taskforce Member, Strategic Plan Goal 1 – Assessment)
- Taskforce Member (Strategic Plan Goal 2 – High Impact Practices)
- Member, Assessment and Educational Effectiveness Committee (2013 & 2014)
- OGC Asst. Director Search Committee (2012 & 2013)
- Member, Internships and Service-Learning Committee Meeting (2013, 2014 & 2015)
- Member, 50th Anniversary Research Celebration Planning Committee (2007)
- Member, OGC Advisory Committee (2010 – 2012)
- FDC Board – ECS representative (2011)

PROFESSIONAL SERVICES/ACTIVITIES

- **Member** of IEEE, ASEE, International Microwave & Instrumentation and Measurement society
- **Reviewer** NSF, FDC (CSUF), IEEE International Symposium on Circuits and Systems, IEEE International Conference on Electronics, Circuits and Systems, IEEE Transactions on Computers, IEEE Transactions on Signal Processing, IEEE Transactions on Instrumentation and Measurement, and IEEE Transactions on Circuits and Systems (I) & (II)
